General Information

1.1 General Information

Thank you for purchasing Memoria! We're very pleased that you have chosen our theme to use on your website. We're doing our best not to disappoint you! Before you get started, please check out these documentation pages. Memoria can only be used with WordPress and we assume that you already have it installed and ready to go. If you don't, please see [WordPress Codex](#) to get started.

1.2 Requirements

Before using Memoria, please meet the following requirements:

- Essentials to run WordPress – Read more about [WordPress Minimum Requirements](#) – in case any doubts regarding the server, contact your host provider.
- Latest version of WordPress, which you can [download here](#).
- Create secure [FTP](#) and Database.

1.3 Installation

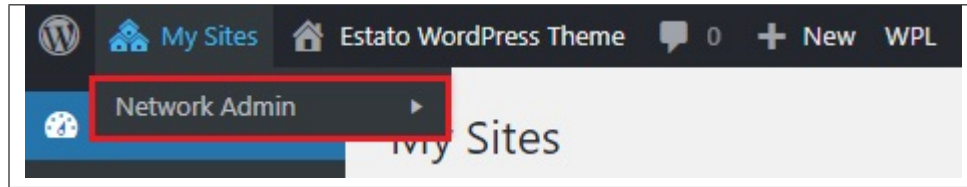

In our guide, we will show you step by step instructions on how to install our WordPress theme for beginners. Below you will find two ways to install a WordPress theme.

1.3.1 Installation via Administration Panel

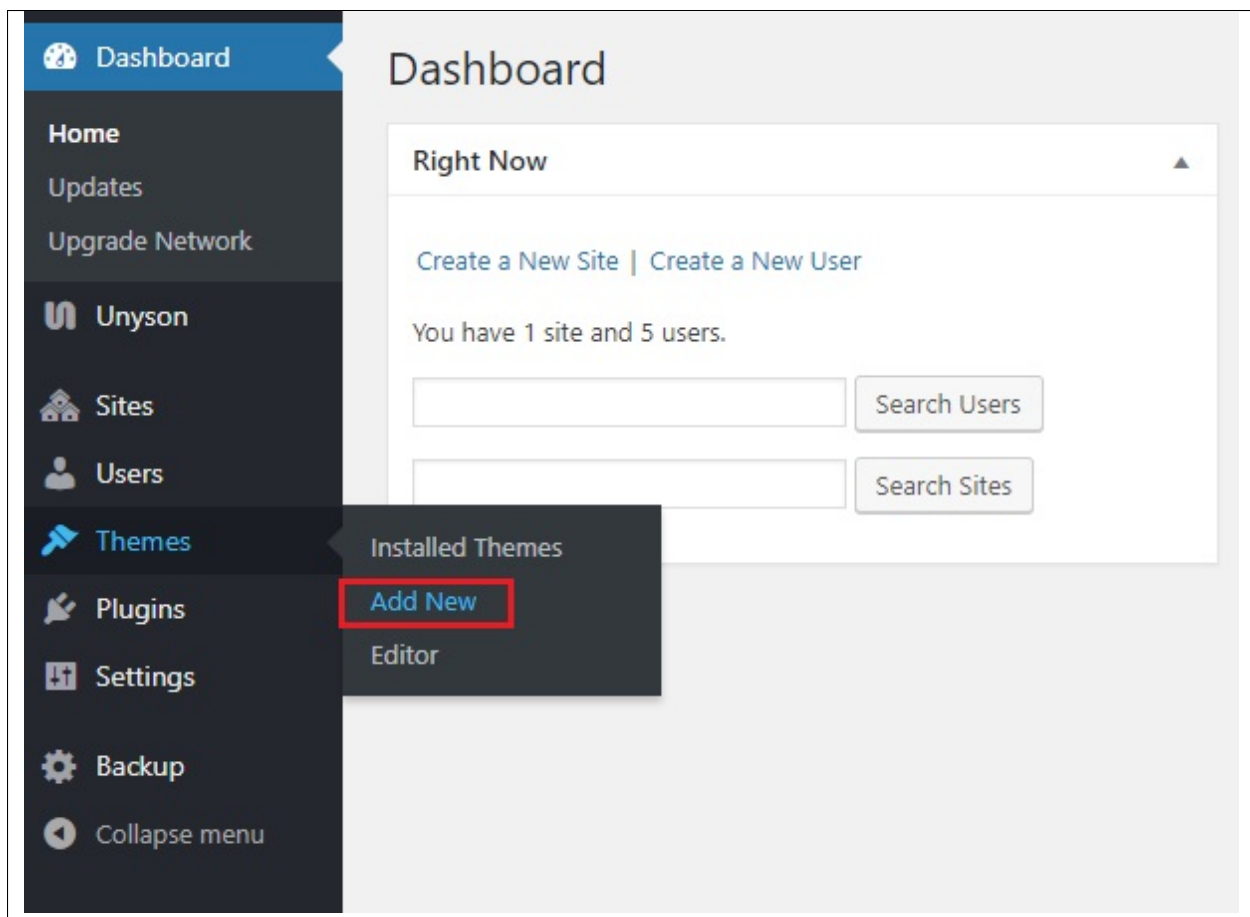

If Memoria files are downloaded from your Themeforest account, you can start an installation using WordPress administration panel.

Follow steps below to install the theme:

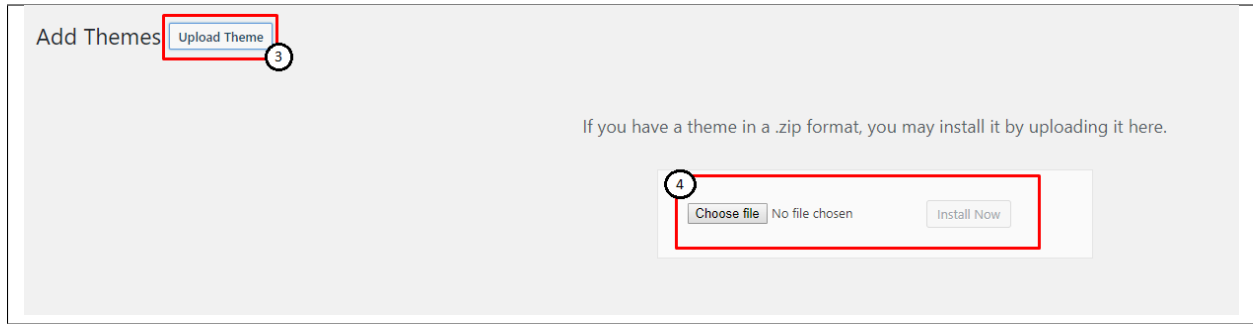

- **Step 1** - Once you've logged in to your administration panel, go to *My Sites > Network Admin*.

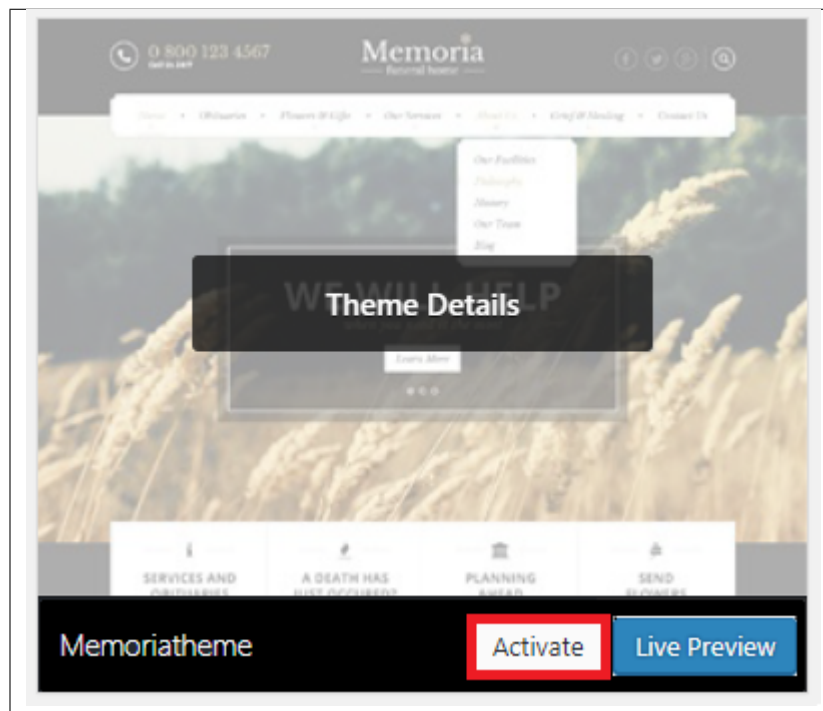

- **Step 2** - Then click on *Themes > Add New*, you will be directed to a page where you can choose available themes.

- **Step 3** - Once directed to the page, on the upper left side of the screen click on *Upload Theme* button.
- **Step 4** - Choose the *Memoriatheme.zip* file from your computer, then click *Install Now*.

- **Step 5** - Click on *My Sites* then go to *Appearance > Themes* and *Activate Memoria*.

- **Step 6** - After activating *Memoria*, you will be sent to *Theme Installation Instruction* steps. By following this steps you will be asked to install required plugins, activate them, and import demo content (required).

Theme installation instructions

Please follow these steps:

1. Install all required plugins, click here: [install plugins](#)
2. Activate all required plugins, click here: [activate plugins](#)
3. Import demo content, click here: (click only when the theme plugin is active)

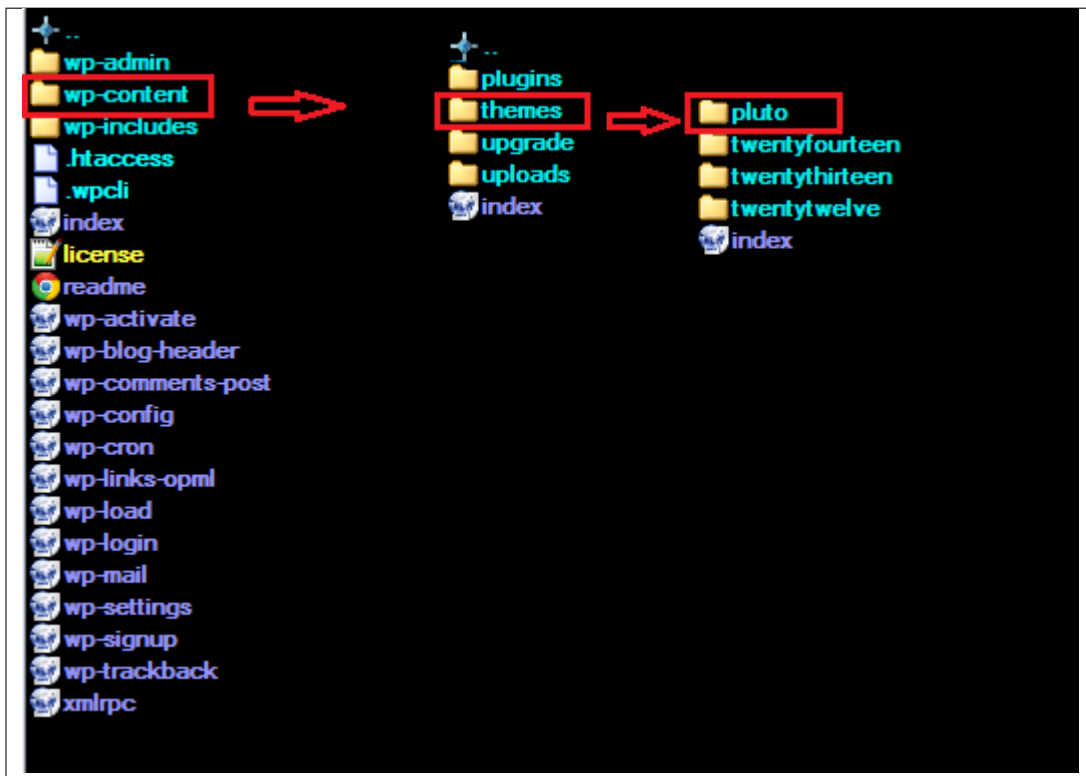

Common Install Error: Are You Sure You Want To Do This?

If you get the following question message when installing *Memoriatheme.zip* file via WordPress, it means that you have an upload file size limit. *Install the theme via FTP* or call your hosting company and ask them to increase the limit.

1.3.2 Installation via FTP

To install Memoria WP via FTP, follow steps below:

- **Step 1** – Unarchive *Memoriatheme.zip* file
- **Step 2** – Access your host web server using FTP client
- **Step 3** – Find directory *wp-content* > *themes*
- **Step 4** – Put folder *Memoriatheme* in directory *wp-content* > *themes*

- **Step 5** - Go to your WordPress administration panel, navigate to *Appearance > Themes* then activate **Memoria** theme.

Learn more:

- [WordPress Codex – FTP clients](#)

1.4 Unyson, Extension, and Plugins

Some functionalities of the Memoria Theme are available because of the plugins we used to create it. Once Memoria is activated in your WordPress admin panel you should see notification about bundled plugins we recommend to install – they are included in Memoria package – so you don't have to do anything more than click *install* and *activate*.

1.4.1 Unyson

[Unyson](#) is a framework for [WordPress](#) that facilitates development of a theme. This framework was created from the ground up by the team behind [ThemeFuse](#) from the desire to empower developers to build outstanding WordPress themes fast and easy. This documentation is heavily modified by [createIT](#) to ensure all custom extensions are well documented.

This documentation assumes you have a working knowledge of WordPress. If you haven't, please start by reading [WordPress Documentation](#).

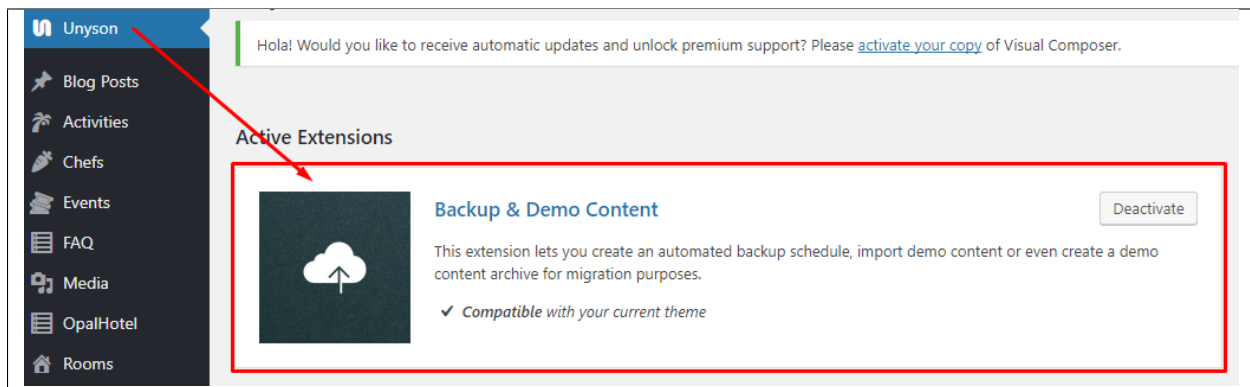

Minimum Requirements

- WordPress 4.4 or greater
- PHP version 5.2.4 or greater
- MySQL version 5.0 or greater

Installation

Unyson is part of *Memoria plugin* that should be activated to be able to use the fully use this theme.

After plugin will be activated you will notice the Unyson entry in the sidebar:

Configure the plugin by going to the Unyson menu and activating the following extensions:

- Backup & Demo Content: This extension lets you create an automated backup schedule, import demo content or even create a demo content archive for migration purposes.
- Breadcrumbs: Creates a simplified navigation menu for the pages that can be placed anywhere in the theme.
- Visual Composer: Allows for seamless integration with Visual Composer.
- SASS Compiler: Compiles SASS files. Remember to activate it when you are going to change theme colors via Customize.
- Memoria Team: This extension will add team post type support.
- CT Testimonials: This extension will add testimonials post type support
- CT Twitter: This extension will add twitter shortcode.
- CT Footer: This extension will add footer sidebars and options.
- CT Obituaries: This extension will add obituaries post type support.

License

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software. Unyson inherits the [General Public License](#) (GPL) from WordPress.

1.4.2 Extension

On the Unyson page you'll see a list of available extensions separated in two sections:

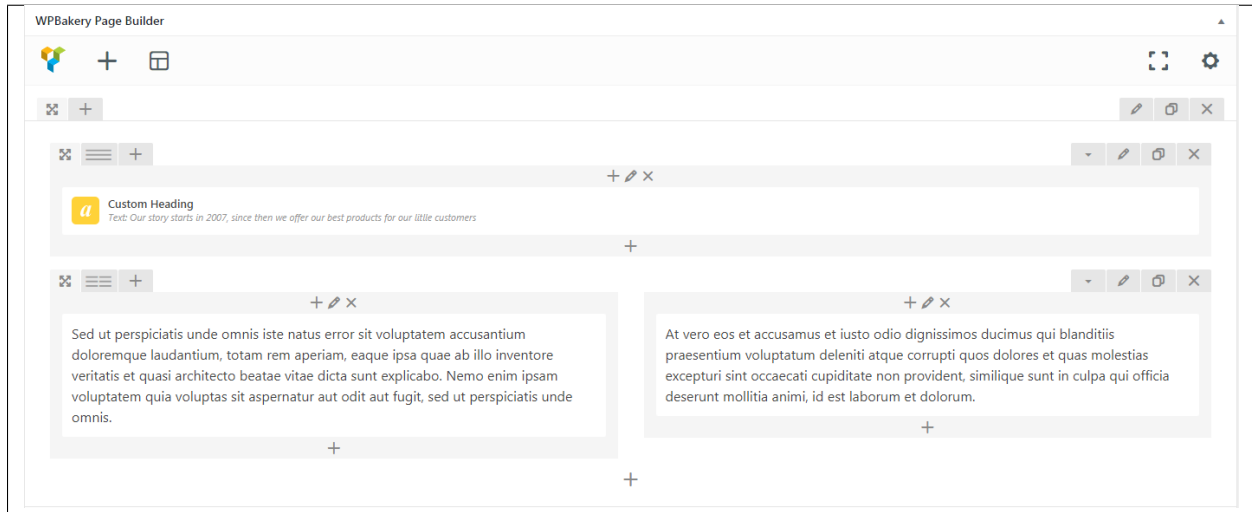

Active Extensions - Extensions that *should be activate* to be able to fully use Memoria WP theme functionality:

Available Extensions - Extensions not yet downloaded or activate.

Note: We recommend to not activate any of the extensions that are not part of the list above. They may not be compatible with the theme and could create unexpected issues.

1.4.3 Plugins

Visual Composer

Simply drag and drop elements to build your page content. We prepared components which will help you determine main structure of the webpage – easily set up backgrounds, colors and styles for whole sections as well as lots of various smaller components which you can freely put wherever you want.

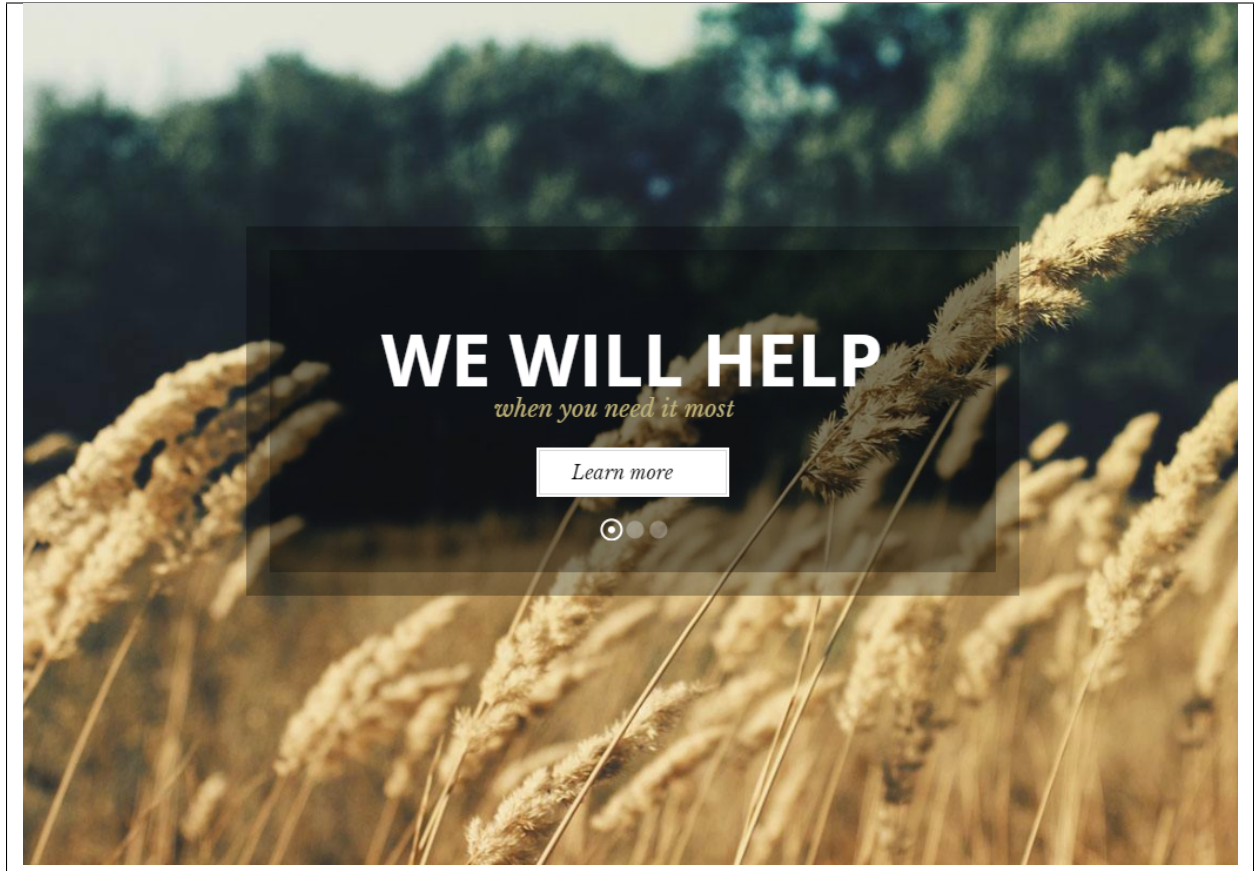

Note: As the VC plugin used with Memoria WP Theme is part of a bundle, that mean that theme author has a license and only he/she can download latest versions of VC and include it in the theme. You as a theme user may use Visual Composer free of charge while you use the theme that came with VC (because you have a license for that theme).

Learn more:

For more information about Visual Composer, please check articles below:

- [How to install Visual Composer](#)
- [Visual Composer demo](#)
- [Visual Composer documentation](#)

Slider Revolution

How to activate the plugin

Slider Revolution is included in Memoria WP package – so you don't have to do anything more than click *install* and *activate* as you do with other plugins.

If you are new user of the revolution Slider plugin or you just want to check some of it functionality feel free to check [Slider Revolution Documentation](#) created by the authors of this plugin.

Common questions:

- [How to update the plugin when it was packaged with your theme?](#)
- [Purchase Code isn't working](#)

Contact Form 7

Contact forms in Memoria WP are created with the use of *Contact Form 7 Plugin*. Below you will find information how to recreate Contact forms used in our theme by adding the correct markup for the Form section of this plugin.

Send us a Message

Copy this shortcode and paste it into your post, page, or text widget content:

1.5 Demo Content

Note: To be able to use theme content installation and backup functionality make sure to activate *Backup & Demo Content* Unyson's extension.

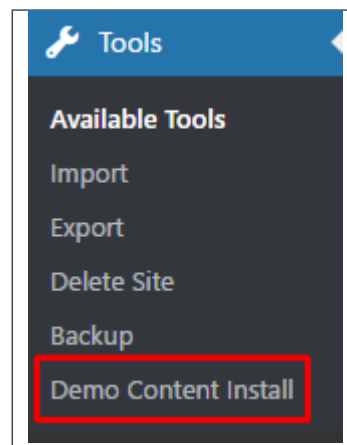

The fastest and easiest way to import our demo content is to use Theme Options *Demo Content Installer*. It will import all pages and posts, sample slider, widgets, theme options, assigned pages, and more.

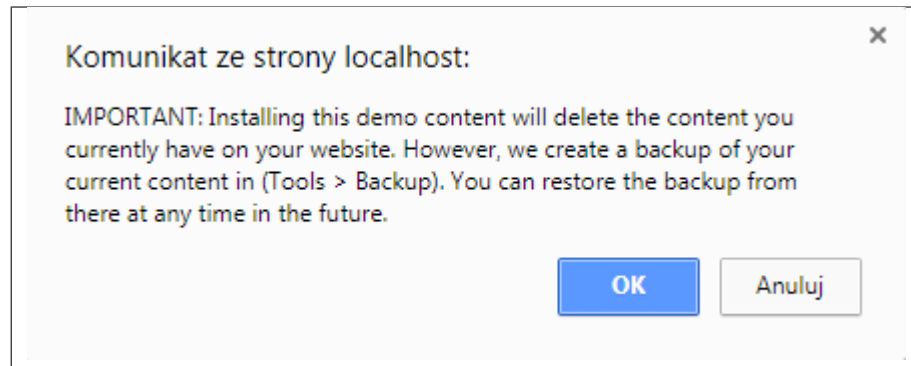

1.5.1 Import Demo Content

To import our demo content, please follow the steps below:

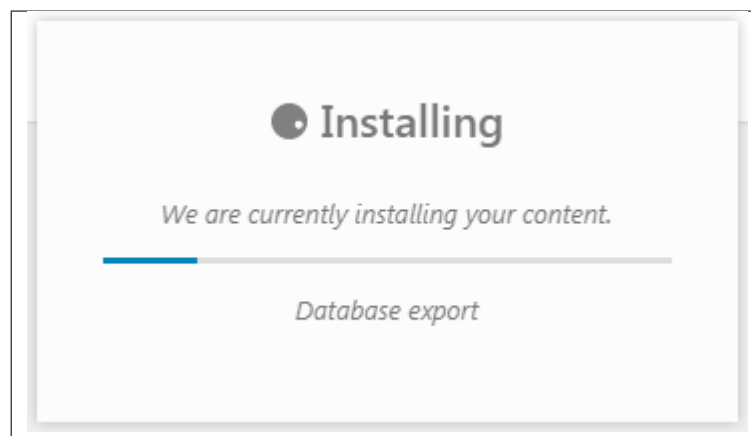

- **Step 1** – Navigate to Tools where after activating the Unyson extension *Demo Content Install* option will be available

- **Step 2** – Choose import option you want to use from available options
- **Step 3** - To be able to continue you need to agree to this term.

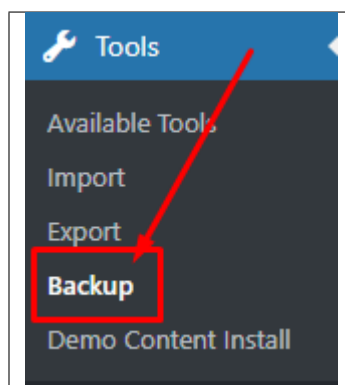

- **Step 4** – Wait until the content will be installed

Importing can take a few minutes. Please be patient and wait for it to complete. Once it is loading, you will see message with indicating progress.

We recommend this approach on a newly installed WordPress. It will *replace* the content you currently have on your website. However, we create a backup of your current content in (Tools > Backup). You can restore the backup from there at any time in the future.

1.6 Support

All of our items comes with free support. Free support is limited to questions regarding the themes features or problems. We provide premium support for code customisation or third-party plugins.

Note: Our support hours: **10:00 AM – 6:00 PM UTC +1 on Monday to Friday.**

1.6.1 Free Support

For issues and concerns, you can reach us through these support methods:

- **E-mail** – support@createit.pl
- **Help Desk** – Click [here](#) to go to our support website. Just click on the *Submit Ticket* button and follow instructions to create a ticket.
- **Forum** – Comment/Post on the product you have issues/queries in [ThemeForest](#) or [CodeCanyon](#) websites.

Before You Post in a Forum

We urge you to follow the steps below, before you post a new topic on the forum, to speed up your request. It's in everyone's interest and will benefit in making the entire forum more efficient:

- **Step 1** – Always check the Documentation and the Knowledgebase Section. Most questions are already answered in those areas.
- **Step 2** – If your question hasn't been brought up on the forum, please post a new topic. Always be as specific as possible. Creating a topic requires entering the live URL to your home page or page that shows the issue in question. It also has bars for WP and FTP login info, which aren't required, however, providing us with your login information can save a lot of time for both of us. Login credentials are securely stored and accessible only by our support staff.
- **Step 3** – We usually answer questions in 24 hours on working days. However, if you don't get any answer within 72 hours bump up your question or send us an e-mail.

For *all support methods*, you will receive confirmations and replies on your queries through e-mail or by tracking your ticket which you will also get through e-mail. To track your ticket, please [click here](#).

Once we reply to your query, *each ticket will be open for 7 days* without a reply from you. On the 6th day without a reply, an e-mail will be sent to notify you of the ticket's inactivity. To make the ticket active again, you simply need to reply or follow the steps in the e-mail. If you won't make the ticket active within 7 days, on the 8th day the ticket will automatically be closed.

1.6.2 Premium Support

We can create your website from scratch, redesign it or just extend the current ones. For more information, please take a look at [our website](#). Typical issues covered by Premium Support:

- Custom CSS
- Support for third party software and plug-ins
- WordPress Installation with Theme configuration
- Server configuration
- Site structure modifications

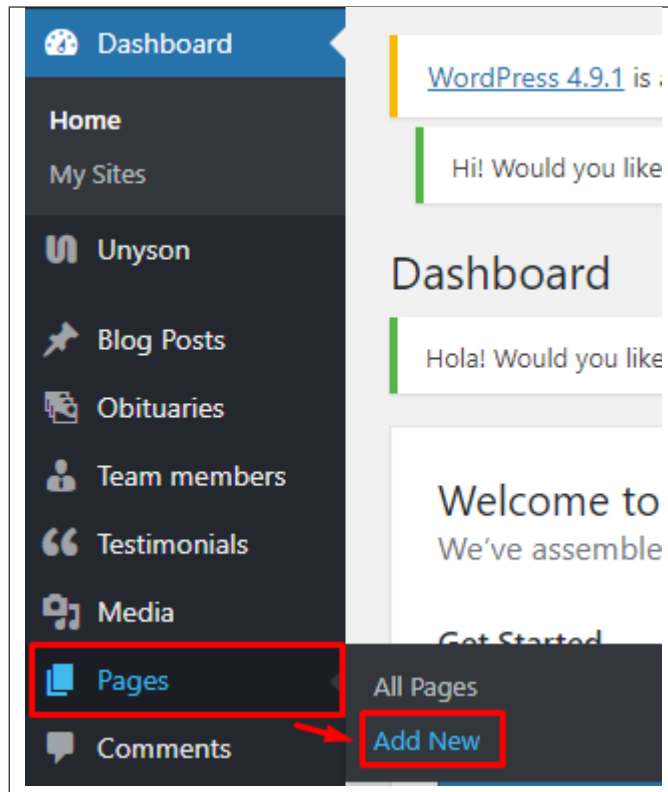

- Graphic adjustments, etc.
- WordPress general howto's

You can use *Pages* to organize and manage any content on your website. You can create multiple pages on your website for different types of content or setup onepager with scroll-to-section menu.

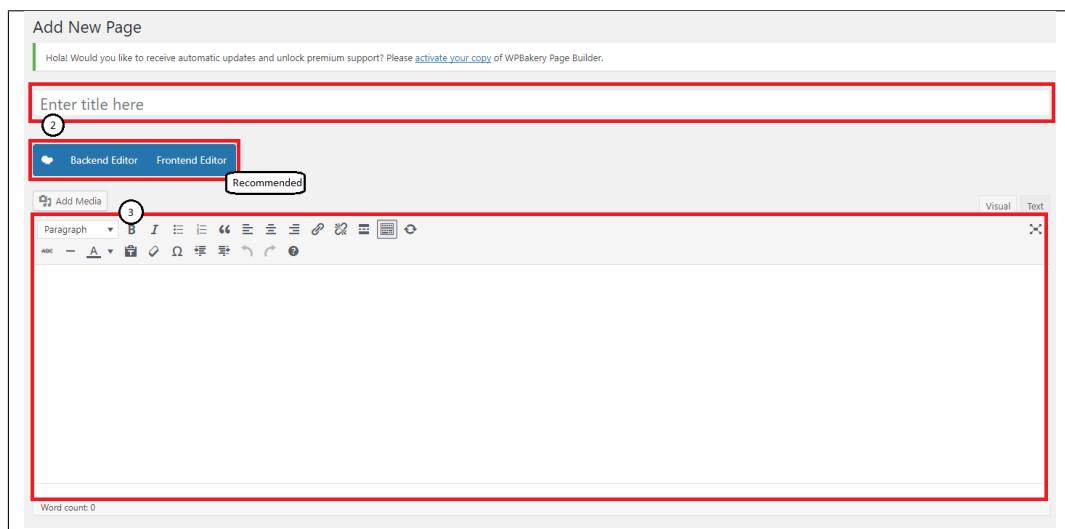

2.1 Create New Page

To create a new *Page* in *Memoria* follow the steps below:

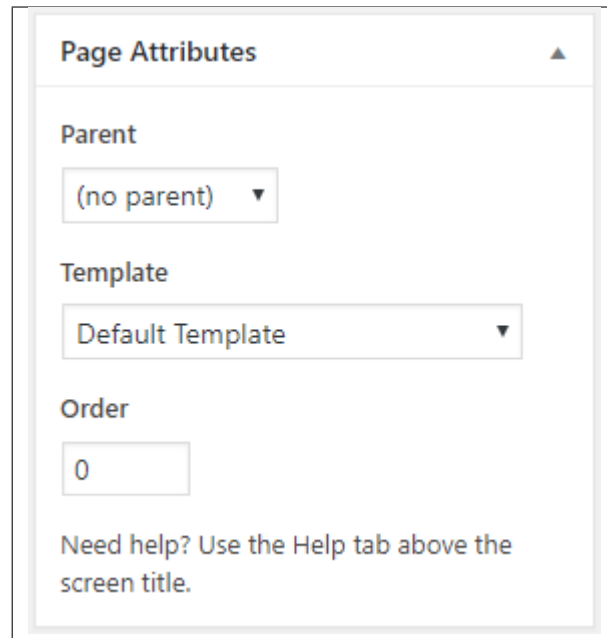

- **Step 1** - In *Dashboard*, navigate to *Pages > Add New*. You will be directed to a page where you can add details on the page.

- **Step 2** - Add the *Title* of the page.
- **Step 3** - Add content – we recommend you to create page content using *Visual Composer* or by modifying demo content.

- **Step 4** - Choose page attributes.

Page Attributes

Parent
 (no parent) ▼

Template
 Default Template ▼

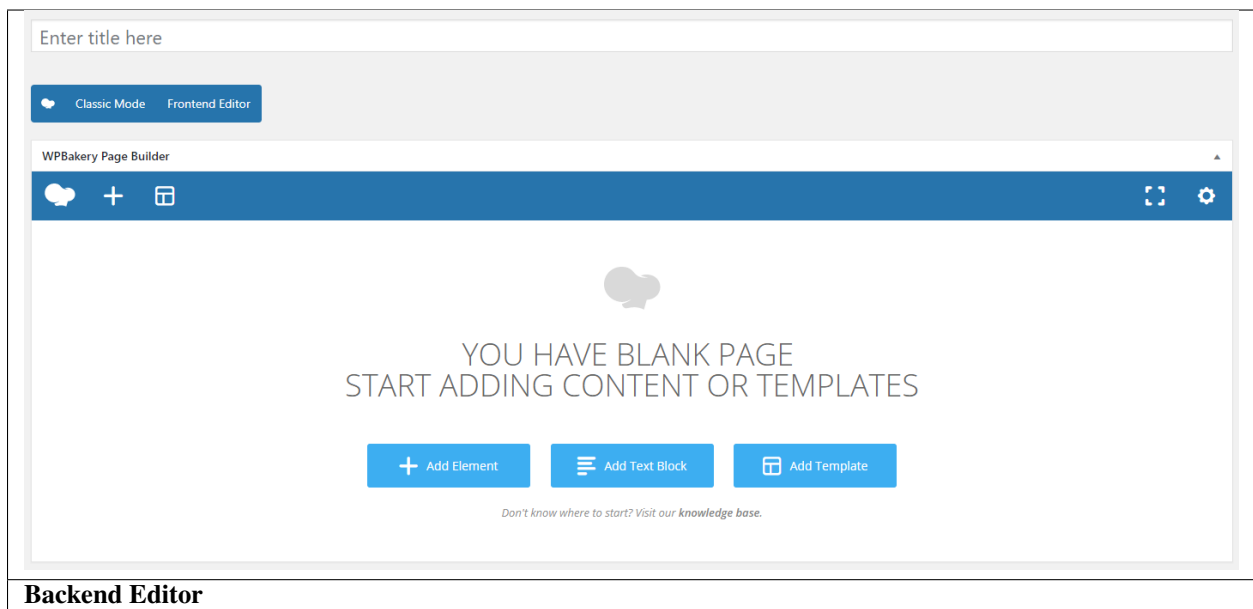

Order
 0

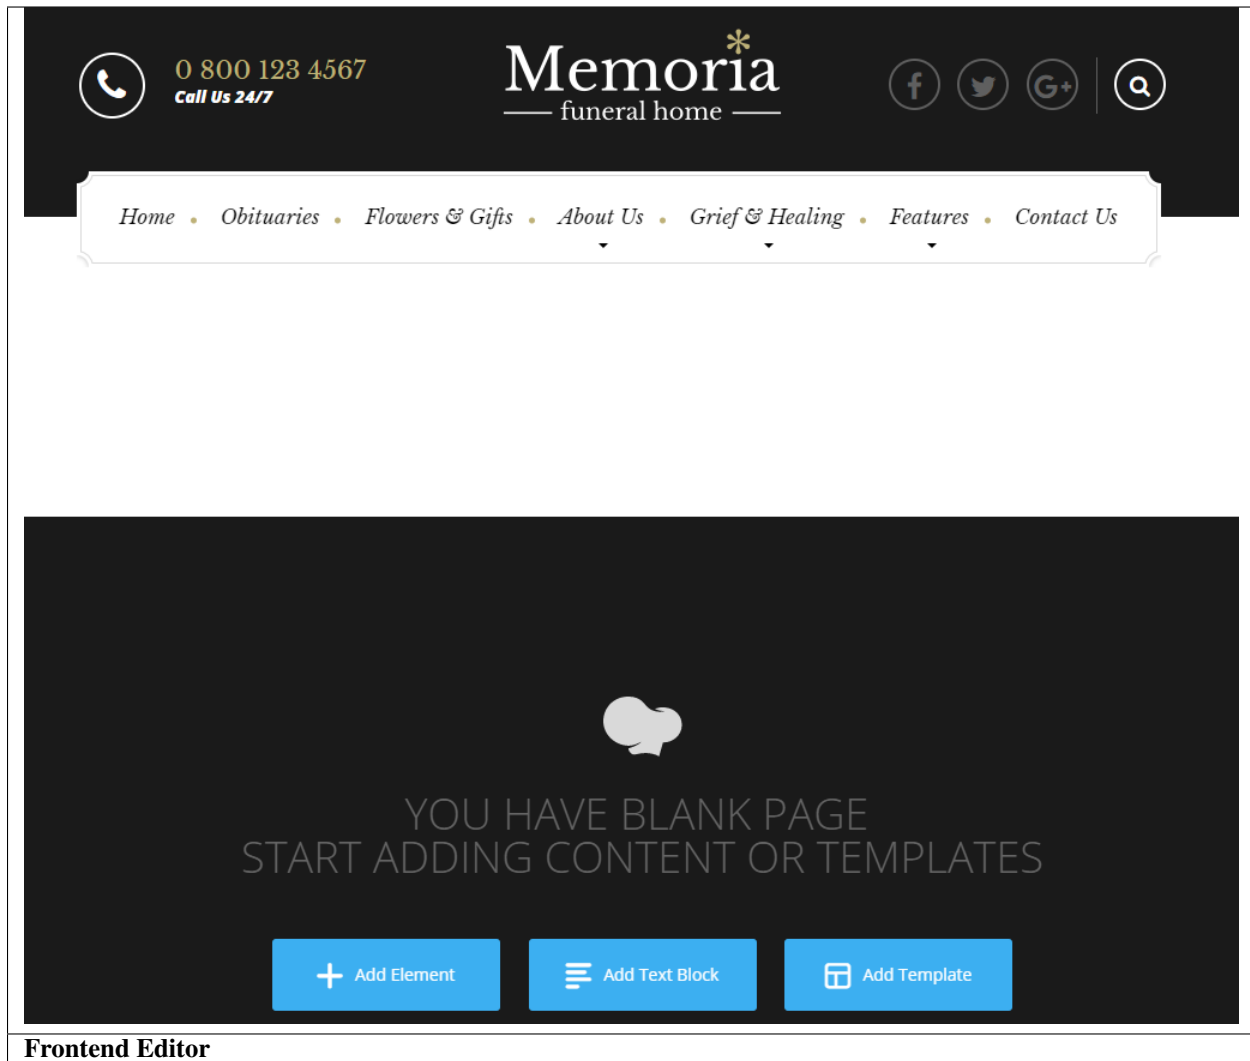

Need help? Use the Help tab above the screen title.

- Parent – If you want to create this page as a subpage.
- Template – You can choose one of defined page templates
- Order – The order of the page.
- **Step 5** - After adding all the contents of the page, click on the *Publish* button.

2.1.1 Create Page Using Visual Composer

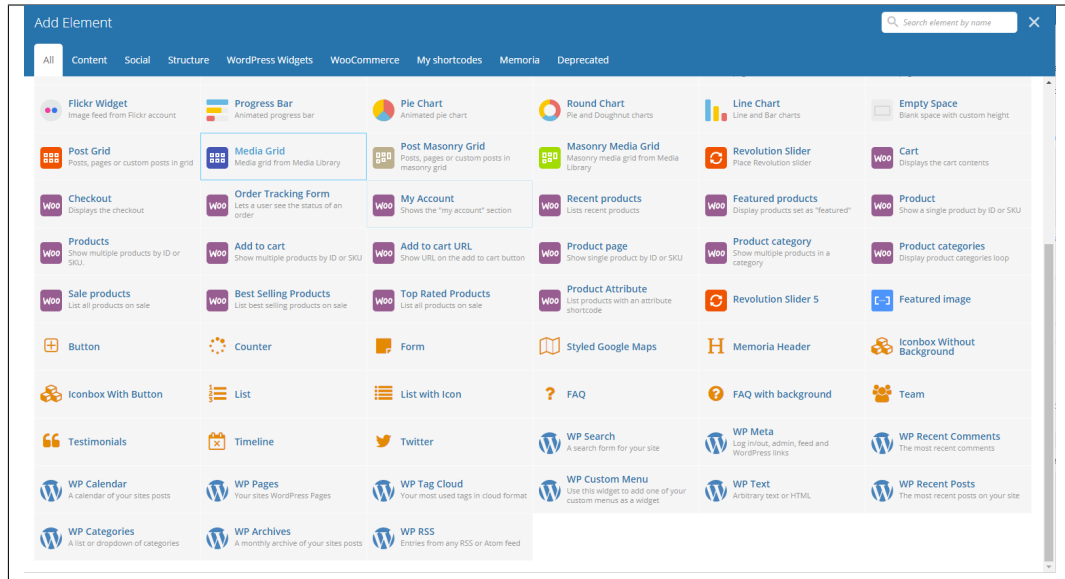

When using *Visual Composer* to add content, you have 2 Editor options, the **Backend Editor** and **Frontend Editor**.

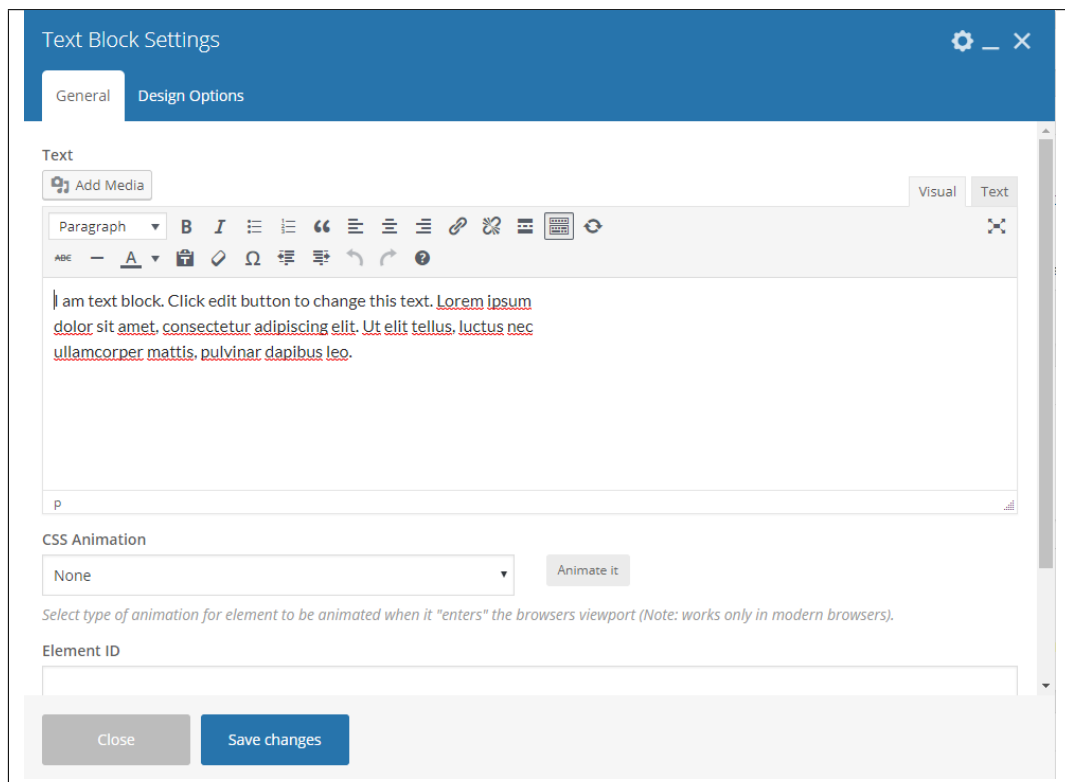

In adding contents to the page, there are many options to choose from. Some of the options are:

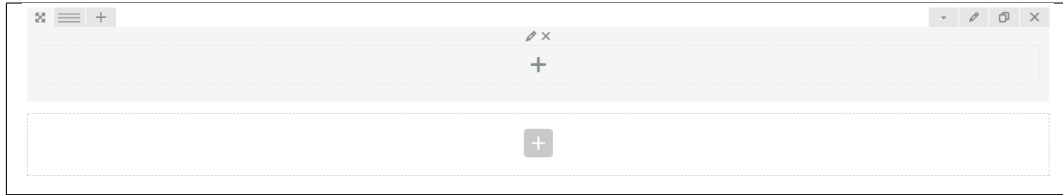

- **Elements** - You will be able to choose elements that are needed and used on the page.

- **Text Block** – This is where you add Text to the page.

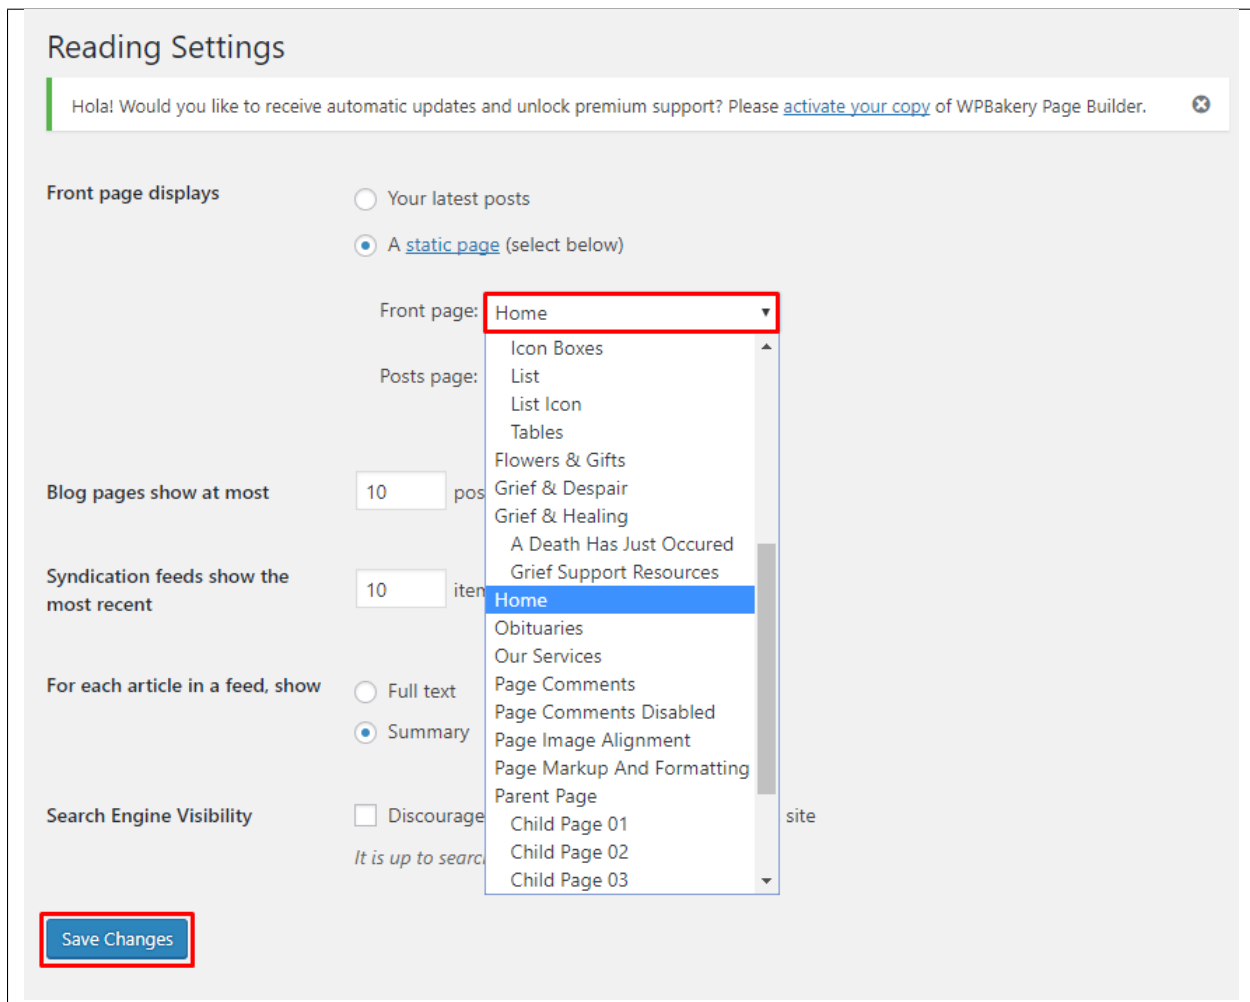

- **Row** – An area where you can add elements.

2.2 Homepage Setup

If you have added some pages via *Pages > Add New* you can choose one and set it up as a homepage.

Use Static front page tool in *Settings > Reading* and choose from the list your homepage. Remember to click *Save* changes at the end of editing.

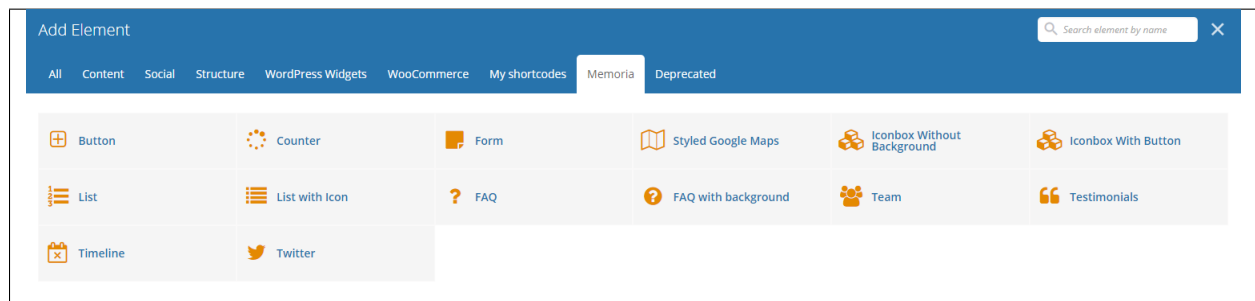

Memoria Elements

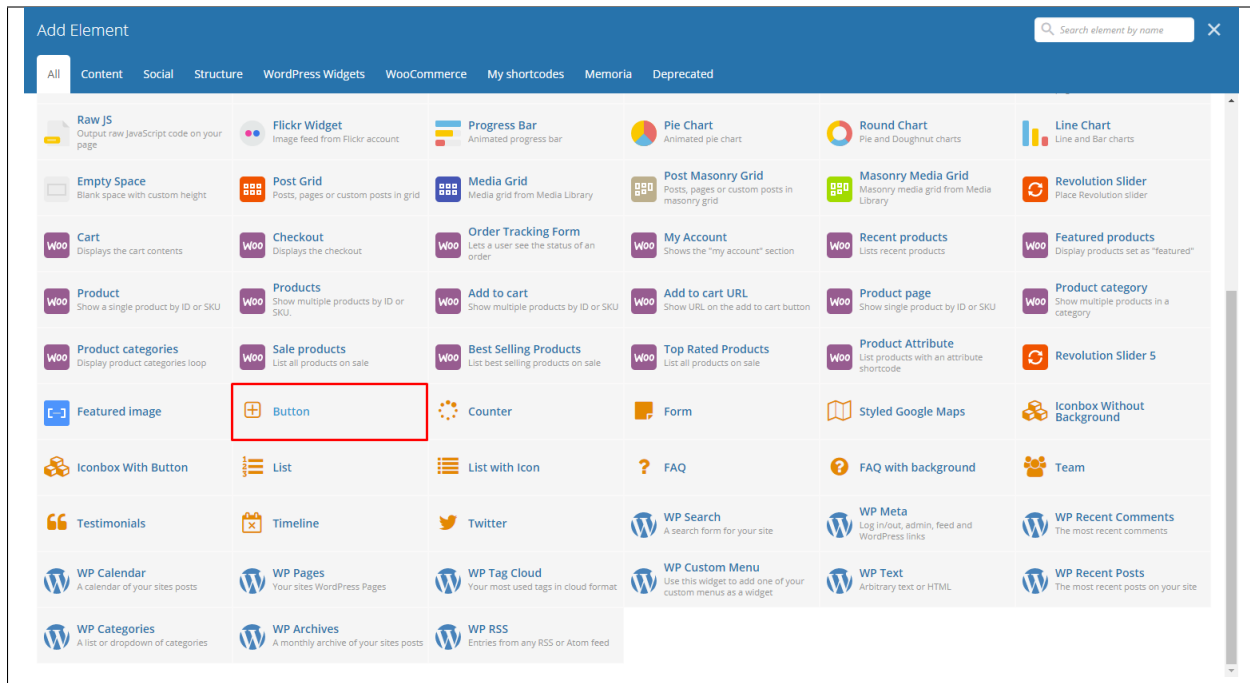

3.1 Memoria Custom Shortcodes

With Memoria comes many custom shortcodes for (Visual Composer) VC that are used to show content created in Memoria.

Below you will find short information about this Visual Composer elements:

3.1.1 Button

This theme comes with VC element that give you the option to create buttons that can be used in the theme.

Sample Timeline in Page

The founders of Memoria Funeral Home, Mike, Arthur, James, and John Dawson. The Dawson's were the ones who made the funeral services popular with their funeral homes in every town.

01-01-1921
Memoria was founded by Dawson brothers

08-05-1942
John Dawson joined USAF to fight in WWII

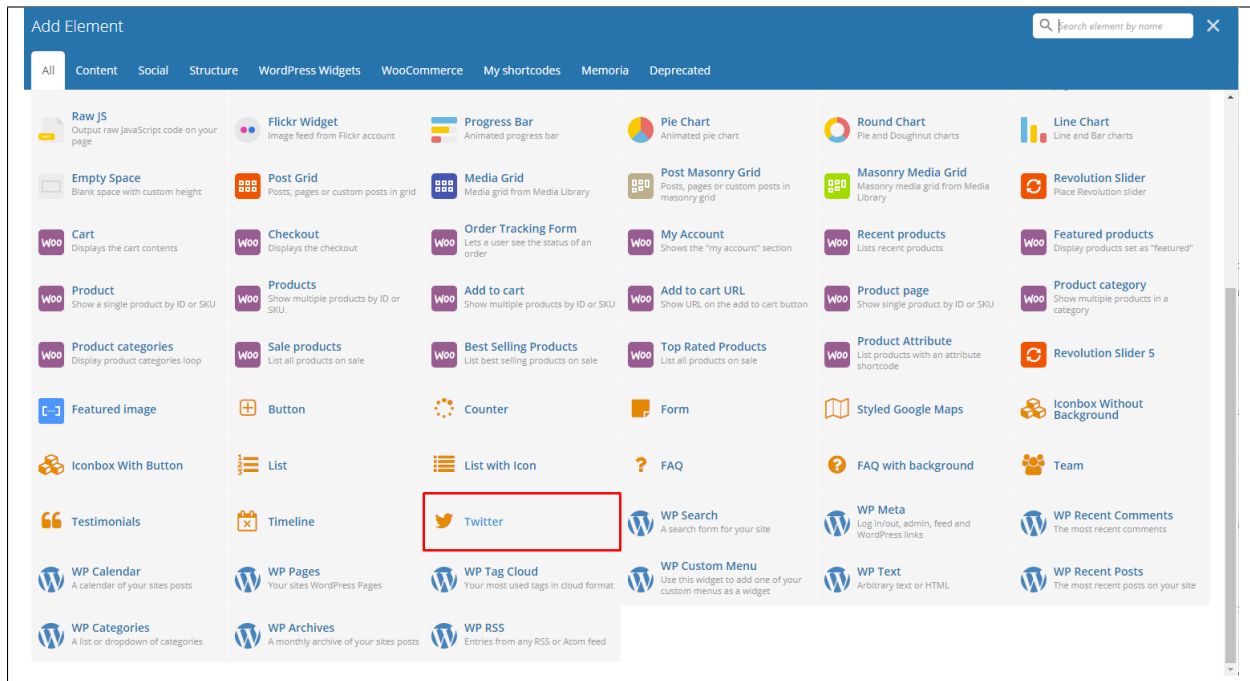

The youngest of the Dawson's served the country in the war. He was a hero to his family and to the country.

With the success of the business, we transferred to a bigger office.

21-07-1963
Funeral home Memoria moved to bigger facilities

3.2 Memoria Plugin Elements

Some plugins that are used in Memoria generates an element that helps customize the pages on your site. You will see the plugin elements as follows:

3.2.1 Contact Form 7

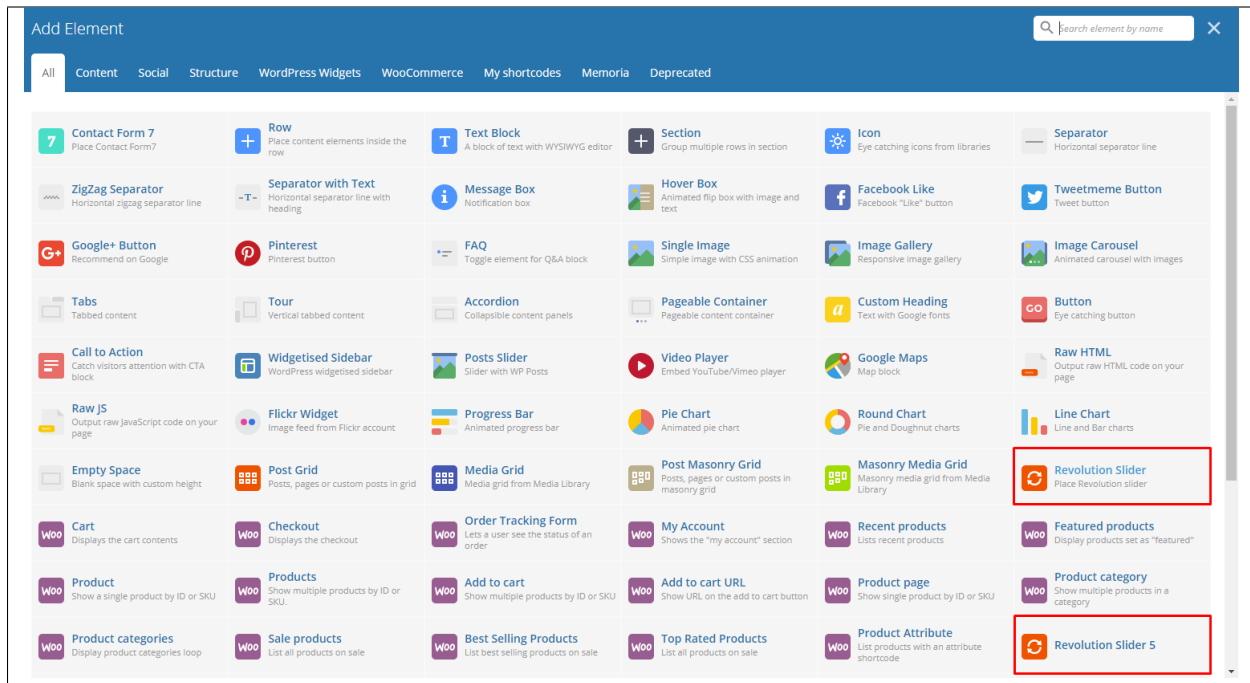

This is the plugin that can add a *Contact Forms* on a page. To know how to create a contact form, go to the [Create Contact Form](#) tutorial.

The screenshot shows a contact form titled 'Send Us a Message' on a dark background. The form contains the following fields:

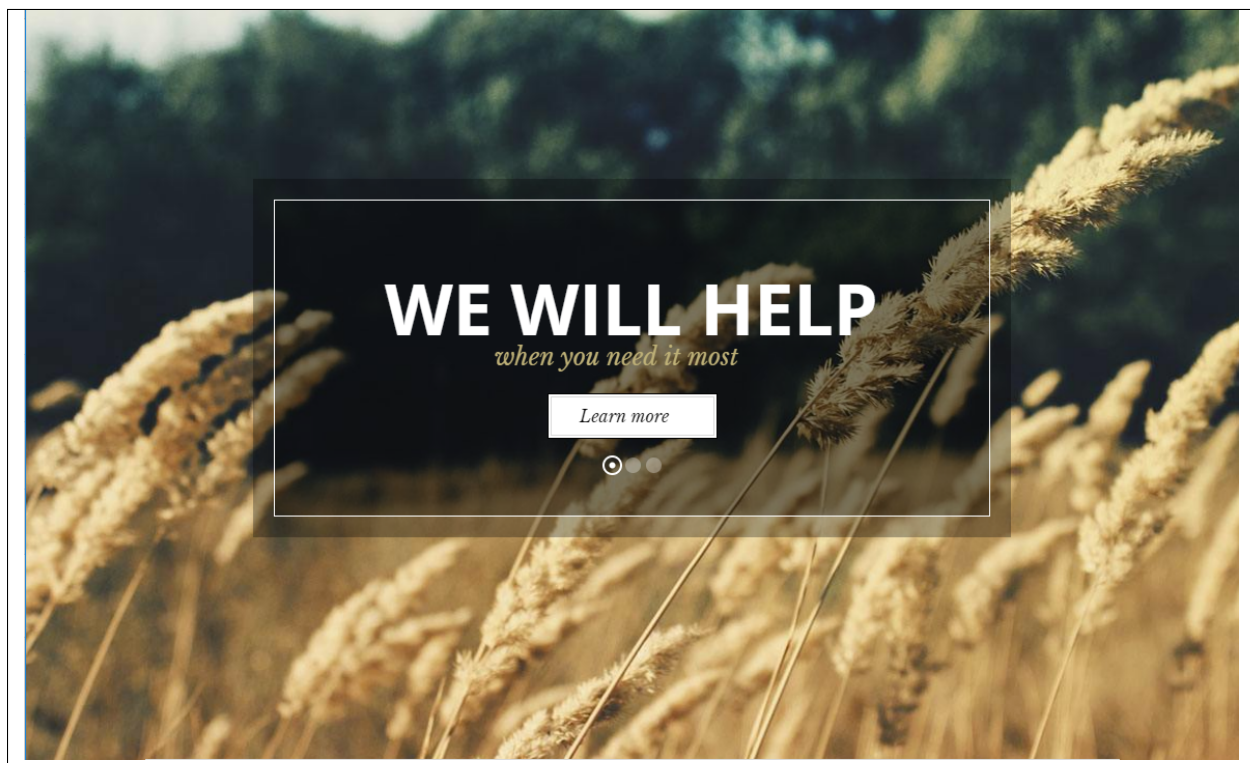

- Your name* (text input)
- Phone no.* (text input)
- Email Address* (text input)
- What can we do for you?* (text area)

At the bottom of the form is a white button labeled *Send Message*.

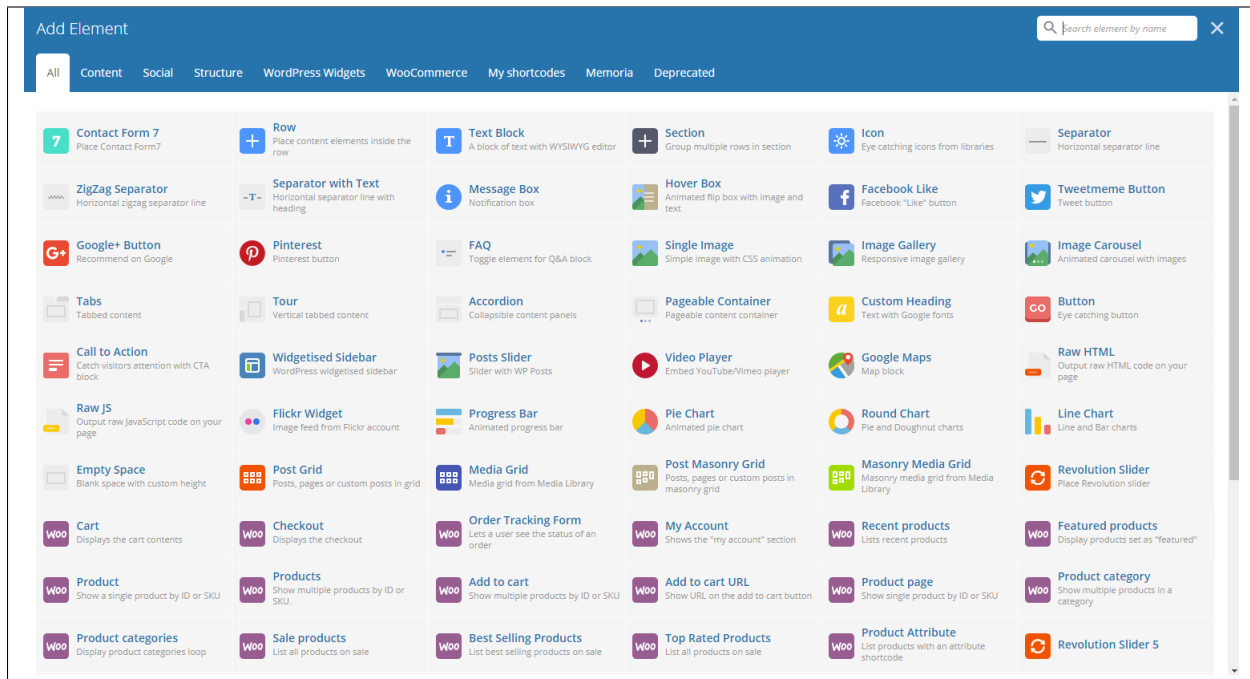

3.2.2 Revolution Slider & Revolution Slider 5

This plugin lets you add a slider that you made under the *Slider Revolution*. The slider revolution lets you make your own customized slider. To know how to use the slider revolution, go to the *Create Revolution Slider*.

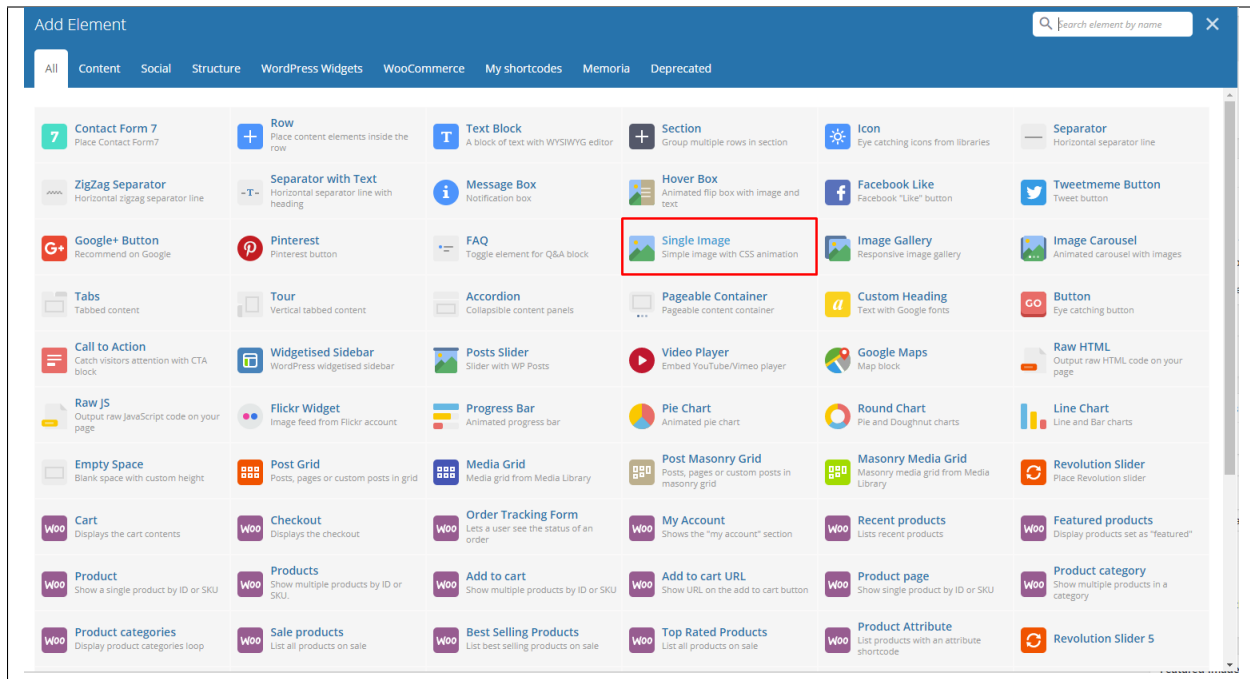

3.2.3 Visual Composer

This element lets you customize your page using a simple drag and drop of elements to build your page content. You can easily setup the backgrounds, colors, and styles for a whole section as well as lots of various smaller components which you can freely put wherever you want.

Some of these elements are:

Single Image

This element will let you add a single image in your page.

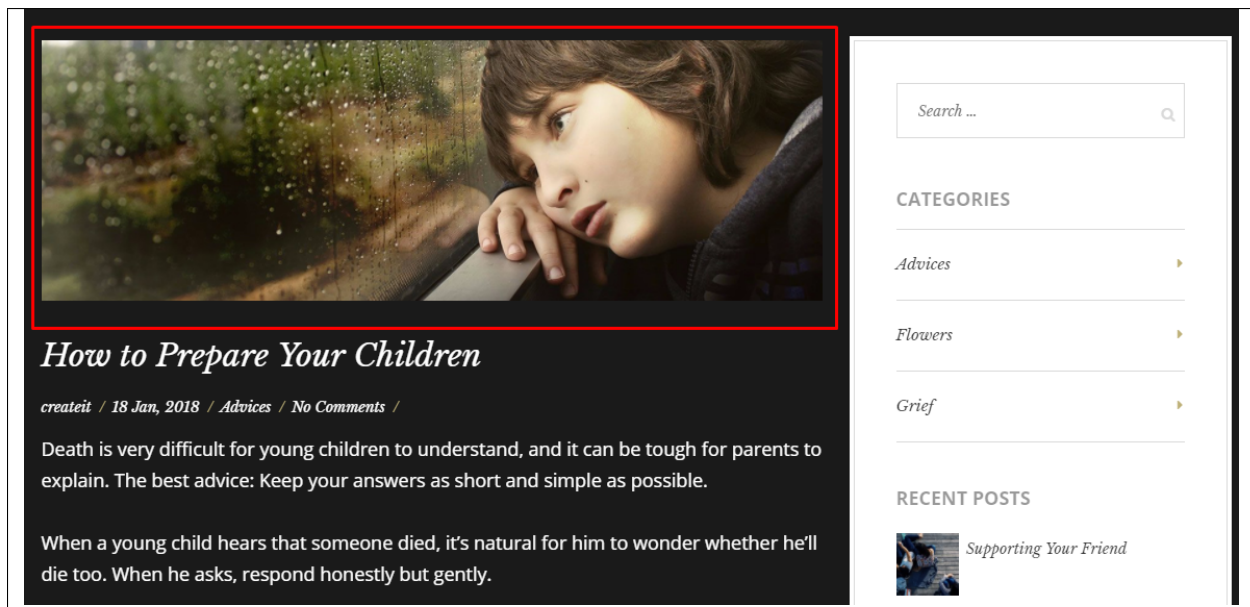

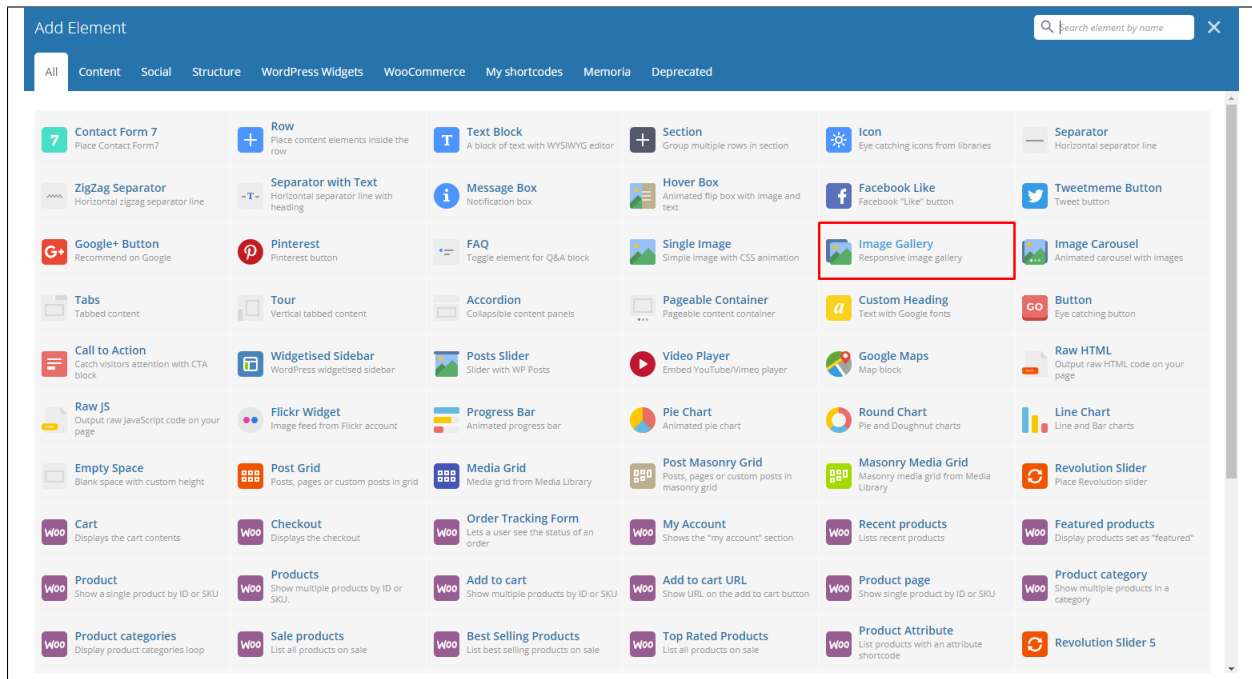

Image Gallery

This element will let you add multiple images in your page.

Blogs Posts

Memoria is loaded with options for the blog. It offers many different options for you to present your blog posts, along with several different blog post layouts. In addition, there are numerous theme options and shortcode options that allow you to customize how posts are displayed.

4.1 Create New Blog Post

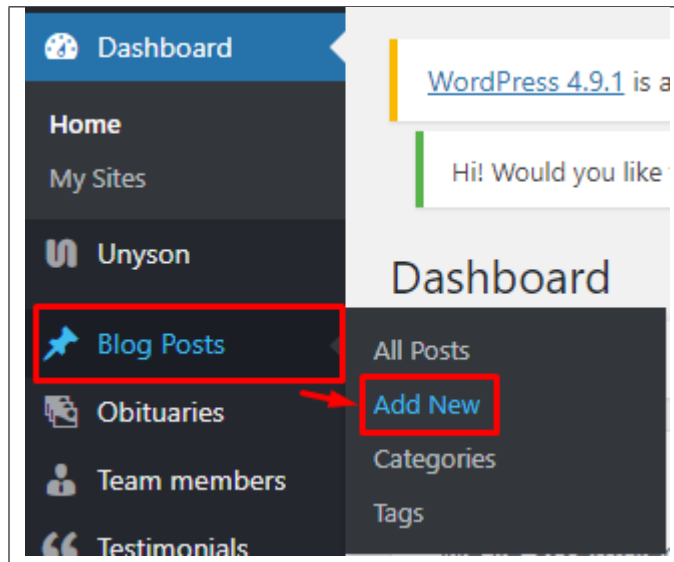

No matter which method you use to display your blog posts, first thing you need to do is create them.

Memoria offers several blog post formats:

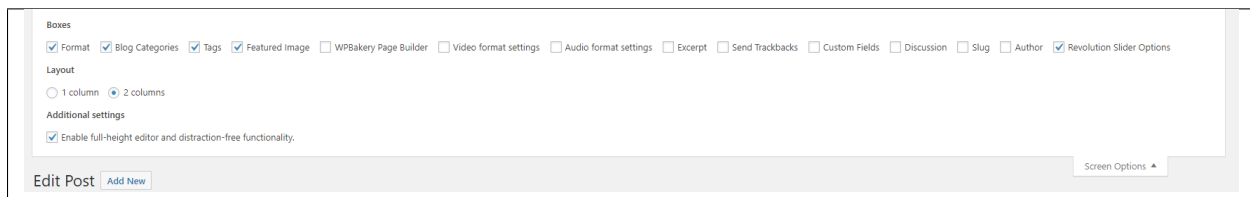

Follow the steps below to create a blog post:

- **Step 1** - Navigate to *Blog Posts* > *Add New* in the Dashboard.

- **Step 2** - Create a title and insert your post content in the editing field. You can use any of our [shortcode](#) elements inside the post. If you want to use some additional fields, choose them from *Screen Options* at the top of the screen.

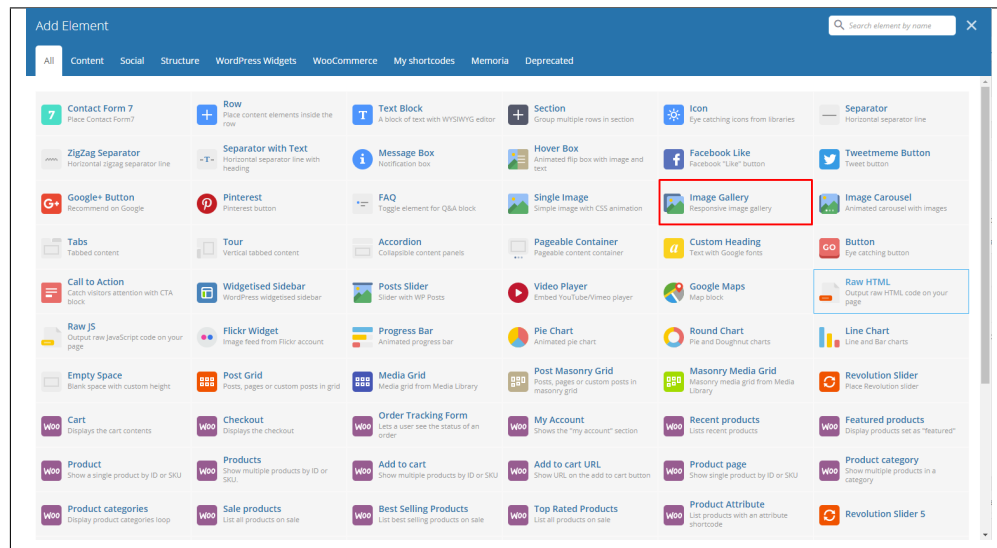

- **Step 3** - Add *Blog Categories* on the right side. Categories are meant for broad grouping of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. *Sub-categories* are made when a Category is added to a Parent Category . To assign it to the post, check the box next to the Category name.

- **Step 4** - To add *Tags*, write the Tags at the textbox below the Blog Categories. Tags are meant to describe specific details of your posts. They are the micro-data that you can use to micro-categorize your content. Tags are not hierarchical. Type the name of the tag in the field, separate multiple tags with commas.

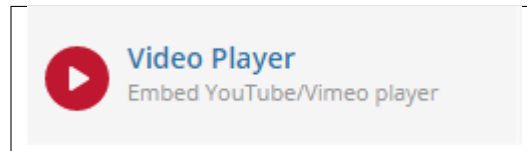

- **Step 5** - To add a *Single image*, click the Featured Image box, select an image and click *Set Featured Image*.

To add more than one image, use *Image Gallery* (Visual Composer element) , each image will be a slide in the gallery slideshow.

Gallery can be created by adding images from Media gallery or by adding External links of the images that will be used.

- **Step 6** – To post *Video*, use Video Player (Visual Composer element) and paste the direct video URL from Youtube, Vimeo or Dailymotion and more.
- **Step 7** – to post *Audio*, use Video Player (Visual Composer element) and paste the direct audio URL from Soundcloud, Mixcloud and more.

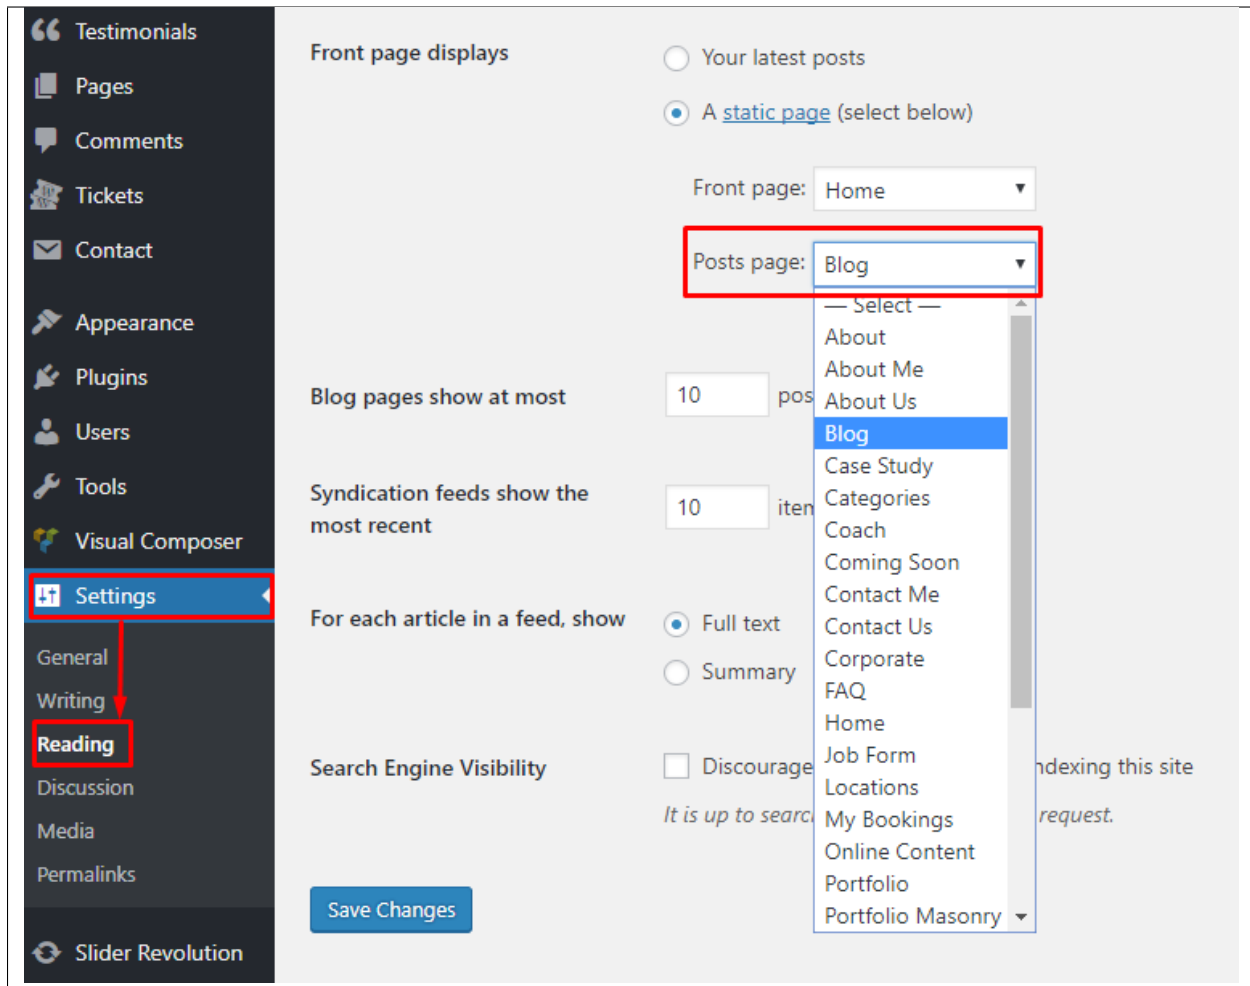

- **Step 8** – For *Quotation*, use WordPress *Blockquote* option (Shift + Alt + Q). 
- **Step 9** – For *Links*, use WordPress *Insert/Edit Link* option (Ctrl + K). 
- **Step 10** – Create an excerpt – *Excerpts* are optional hand-crafted summaries of your content that can be used in your theme. [Learn more about manual excerpts.](#)
- **Step 11** – Once finished, click *Publish* to save the post.

You will see all the Blogs created at *Blog Posts > All Posts*.

4.2 Blog Index Page

The most popular way of displaying blog posts is to setup *blog index page*. There all of your posts will be displayed and ordered by publish date.

To set the page as your post page, navigate to Posts page tool in *Settings > Reading* and choose Blog index page from the ones you created.

Note: On Blog index page you will see only your posts, so don't add any other content to it.

4.3 Blog Category

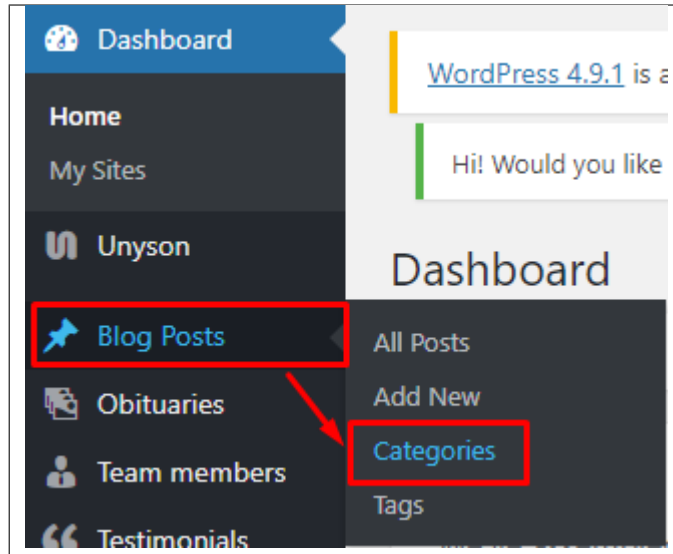

Categories are meant for *broad grouping* of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. **Sub-categories** are made when a Category is added to a Parent Category.

Adding categories to a blog would make it easier to locate and post on similar topics by category.

4.3.1 Create Blog Category

To create a *Category* for a blog, follow these steps:

- **Step 1** - Navigate your Dashboard to *Blog Posts > Categories*. You will see the *Blog Categories* page.

- **Step 2** - In the page, find the *Add New Category* area. Add All the necessary information.

Add New Category

Name

The name is how it appears on your site.

Slug

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Parent Category

None ▼

Categories, unlike tags, can have a hierarchy. You might have a Jazz category, and under that have children categories for Bebop and Big Band. Totally optional.

Description

The description is not prominent by default; however, some themes may show it.

Add New Category

- **Name** - The name of the category.
 - **Slug** - The URL-friendly version of the name. Usually all lowercase.
 - **Parent Category** - If the category is a sub-category, then look for the parent category in the drop-down box.
 - **Description** - Description of the category.
- **Step 3** - Once done filling out the information of the category, click on *Add New Category* button to save.

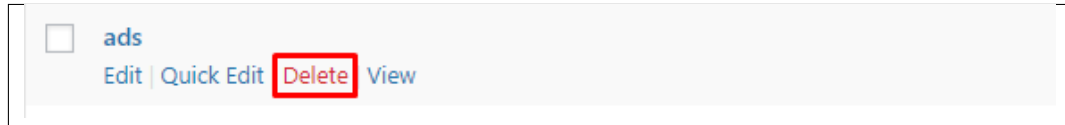

4.3.2 Delete Blog Category

To delete a Category, navigate your Dashboard to *Blog Posts > Categories*.

In the *Blog Categories* page, you will see all the created category.

To delete a category, you have two options:

- **Single Delete** - Hover your mouse pointer on the category that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple categories, click on the box beside the categories you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

4.4 Blog Tags

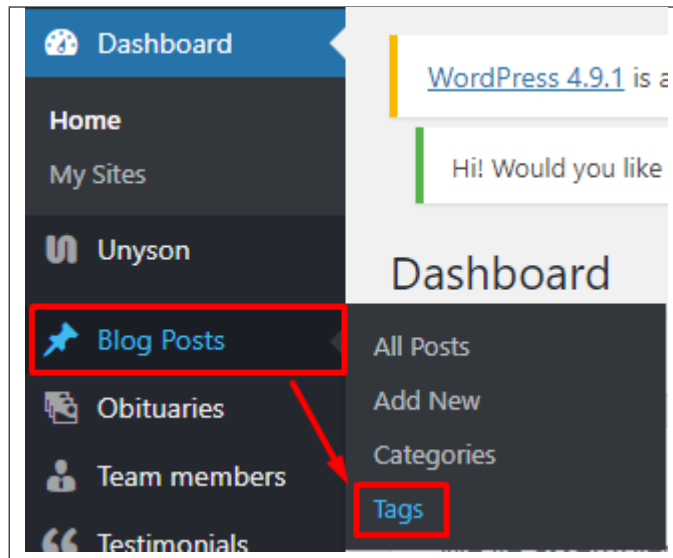

Tags are meant to describe *specific details* of your posts. They are the micro-data that you can use to micro-categorize your content. Tags are not hierarchical.

Adding tags to a blog post would make it easier to relate a post with another post even if the categories are different.

4.4.1 Create Blog Tags

To create a *Tag* for a blog, follow these steps:

- **Step 1** - Navigate your Dashboard to *Blog Posts > Tags*. You will see the *Tags* page.

- **Step 2** - In the page, find the *Add New Tag* area. Add All the necessary information.

Add New Tag

Name

The name is how it appears on your site.

Slug

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Description

The description is not prominent by default; however, some themes may show it.

Add New Tag

- **Name** - The name of the tag.

- **Slug** - The URL-friendly version of the name. Usually all lowercase.
- **Description** - Description of the tag.
- **Step 3** - Once done filling out the information of the tag, click on *Add New Tag* button to save.

Note: Adding a tag may affect the tags from other component of the site.

4.4.2 Delete Blog Tags

To delete a tag, navigate your Dashboard to *Blog Posts > Tags*.

In the *Tags* page, you will see all the created tags.

To delete a tag, you have two options:

- **Single Delete** - Hover your mouse pointer on the tag that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple tags, click on the box beside the tags you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

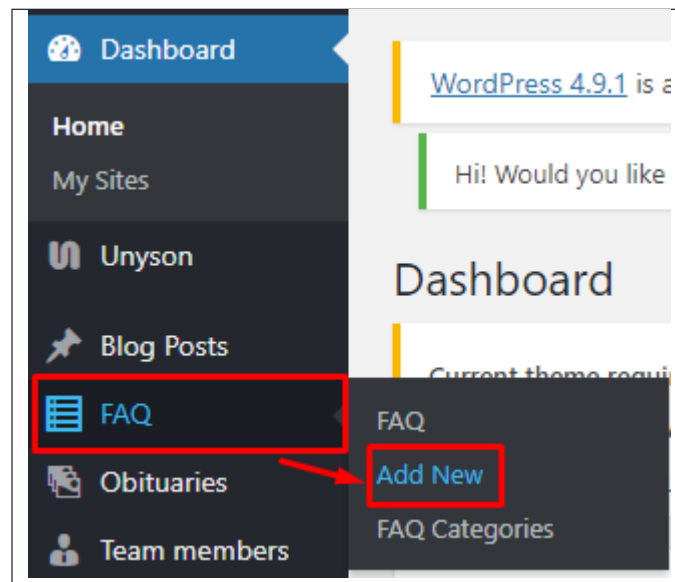

Note: Deleting a tag may affect the tags from other component of the site.

5.1 Create FAQ Item

Frequently Asked Questions (FAQ) of *Confetti* is generated by the theme from FAQ items.

To create a new FAQ item, navigate in WordPress Dashboard to *FAQ > Add New*.

The *Add New FAQ* page will show, information on the FAQs can be define here.

4. **Featured Image** - This will be used as the background when the element **FAQ with background** is used.

Once done, click on *Publish* button.

5.1.1 Create FAQ Categories

Categories are convenient ways to organize your FAQ items, that can be added to more than just one category.

To create new *FAQ Category*, navigate in WordPress Dashboard to *FAQ > FAQ Categories*.

The *FAQ Categories* page will show, here you can add the details of the FAQ Category that you would like to create.

FAQ Categories

Add New category

Name

The name is how it appears on your site.

Slug

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Parent FAQ Category

None ▾

Assign a parent term to create a hierarchy. The term Jazz, for example, would be the parent of Bebop and Big Band.

Description

The description is not prominent by default; however, some themes may show it.

Add New category

After adding all the details, click on *Add New category* to save.

5.1.2 Delete FAQ Category

To delete a Category, navigate your Dashboard to *FAQ > FAQ Categories*.

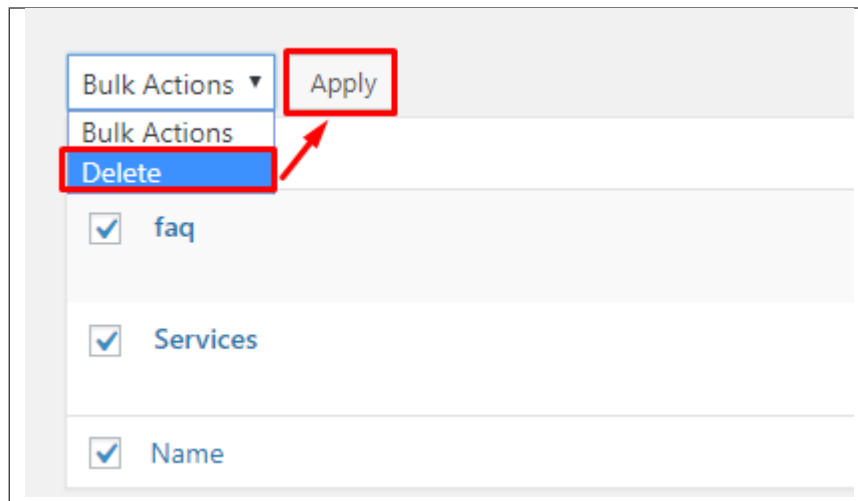

In the *FAQ Categories* page, you will see all the created category.

To delete a category, you have two options:

- **Single Delete** - Hover your mouse pointer on the category that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple categories, click on the box beside the categories you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

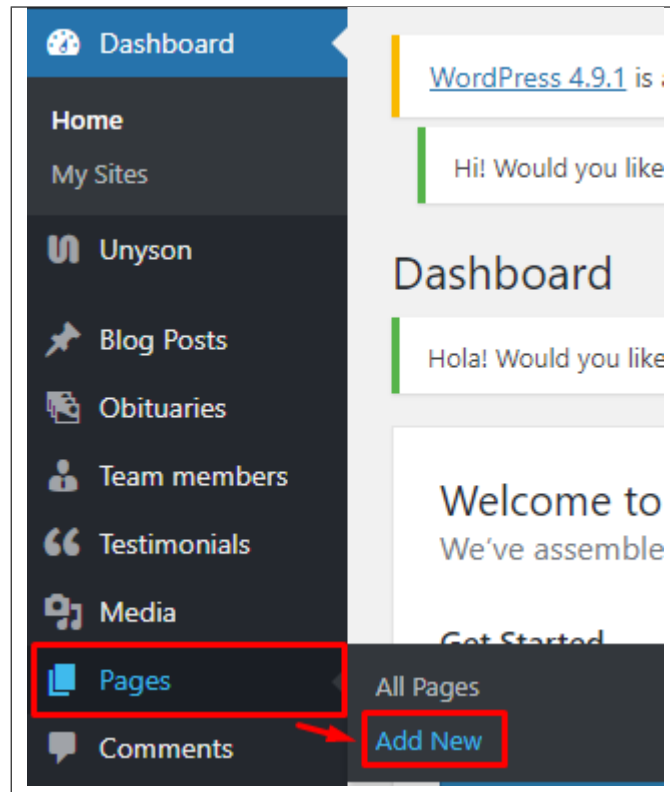

5.2 Create FAQ Page

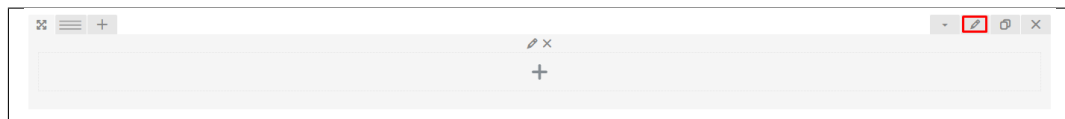

Frequently Asked Questions (FAQ) of Confetti is generated by the theme from *FAQ*.

To create an *FAQ Page*, follow these steps:

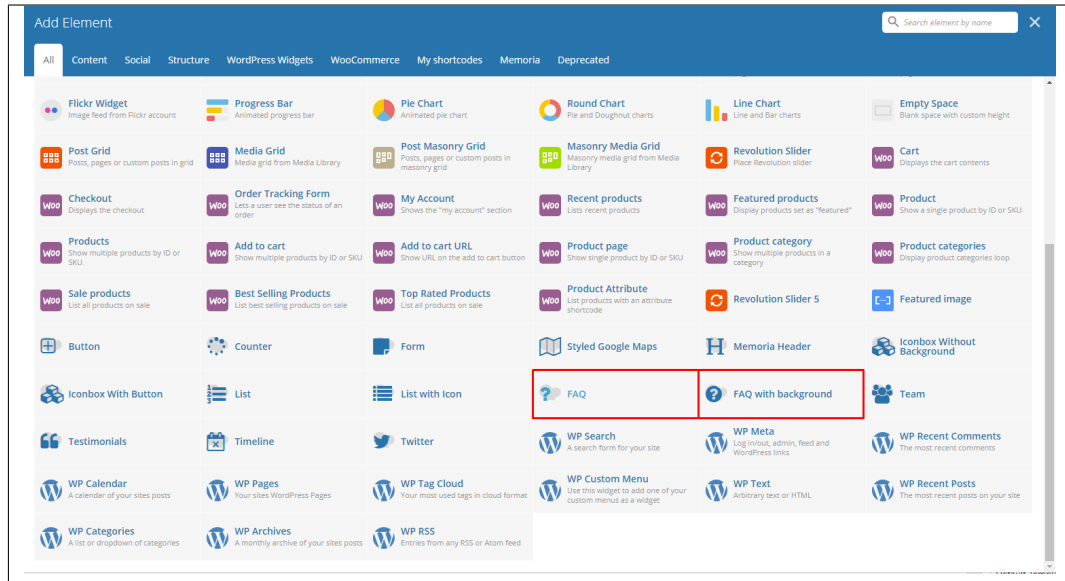

- **Step 1** - Create a new page where to add the FAQs.

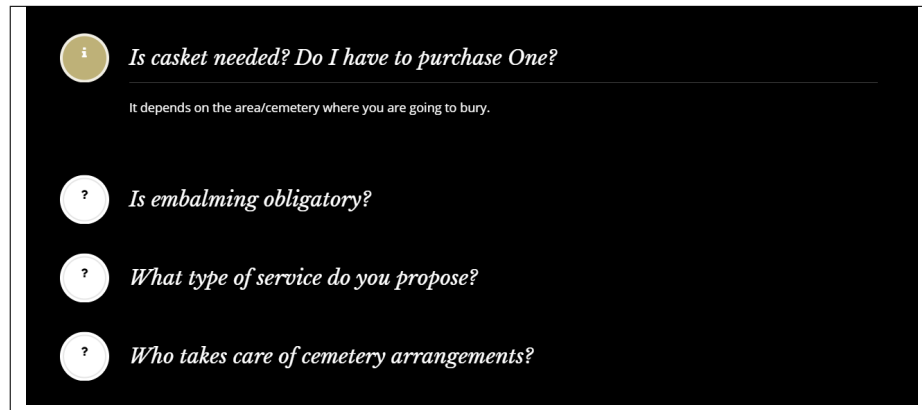

- **Step 2** - Add a row element to the page, click the *Edit this row* option of the row. The *Row Settings* will pop-up.

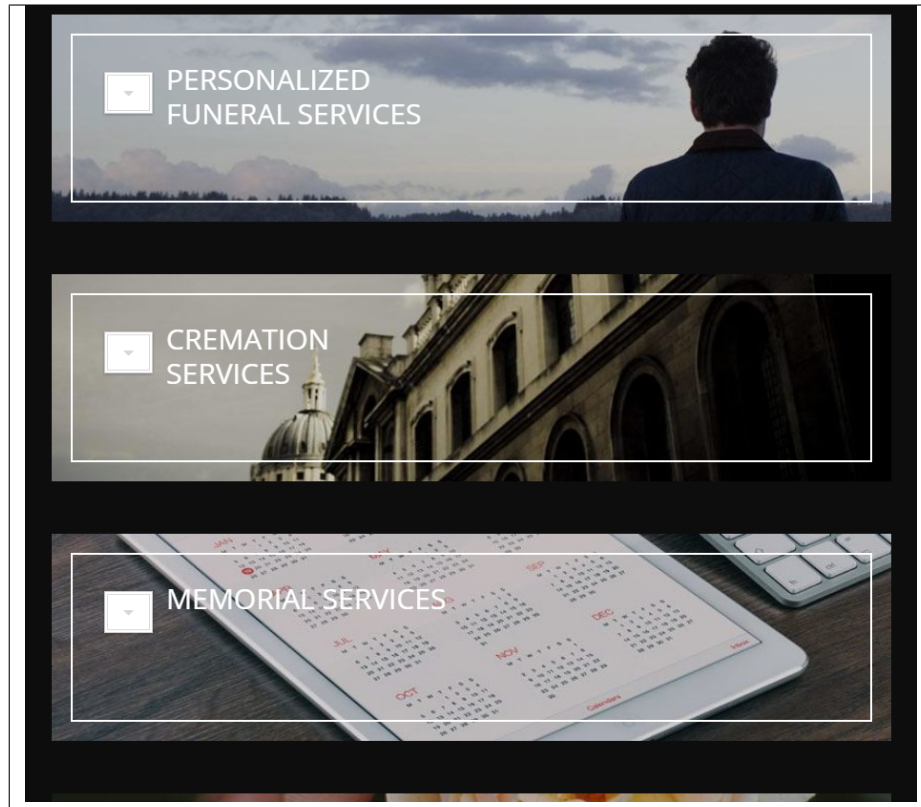

- **Step 3** - Change the settings to your preference.
- **Step 4** - In the row, to add a title for the page. You have the option to add a *Text Block* or *Section/Header Title* element.
- **Step 5** - Add a new row to add the *FAQ Items*. The *FAQ Items* can be generated by 2 types of *Theme Element*: **FAQ** or **FAQ with background**.

1. **FAQ** - This will let you display all the FAQ items or you can specifically add FAQ Items using the categories of the FAQ Items.

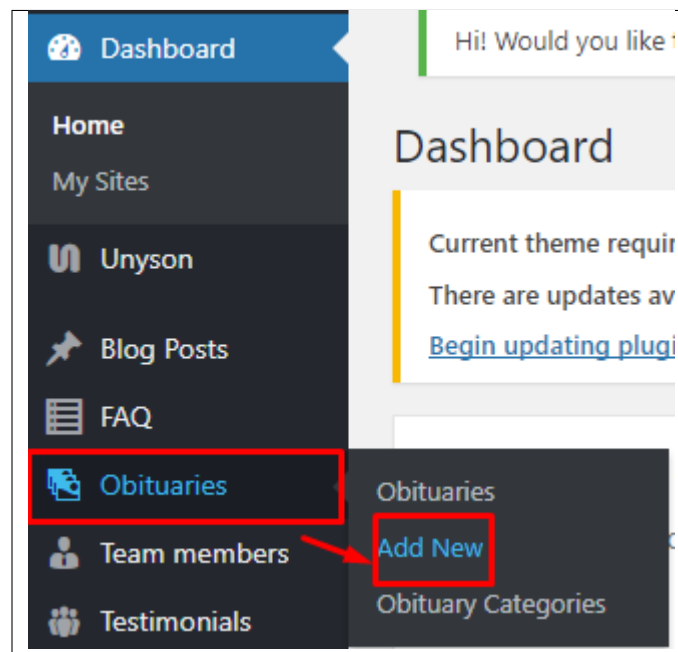

2. **FAQ with background** - The FAQ Items are shown with a background.

- **Step 6** - You can customize the page by adding other elements to the page.
- **Step 7** - Once you have finished customizing the page, click on the *Publish* button.

6.1 Create Obituaries

To create a new *Obituary* item, navigate in WordPress Dashboard to *Obituaries > Add New*.

The *Add New Obituary* page will show. Add the details for the Obituary.

The screenshot shows the 'Add New Obituary' form. It includes a title field (1), a large text editor (2) with a rich text toolbar, a sidebar with 'Obituary Categories' (3) and 'Featured Image' (4), and a bottom section for 'Obituary options' (5). The title field is a simple text input. The editor (2) has a toolbar with various formatting options like bold, italic, link, quote, image, and code. The sidebar (3) shows a list of years (2014-2017) for categories. The 'Featured Image' section (4) has a 'Set featured image' link. The 'Obituary options' section (5) includes fields for Title, Client website, Birth date, Date of death, and a checkbox for 'Share / Send Flowers links'.

1. **Title** - The name of the Obituary.
2. **Editor container** - You can add here text for description/information about the Obituary that will be shown in the website.
3. **Obituary options**
 - Title
 - Client website
 - Birth date
 - Date of death
 - Share / Send Flowers links
4. **Obituary Categories**
5. **Featured Image** - Obituary's picture that will be shown in the site.

After adding all the details, click on *Publish* button to save.

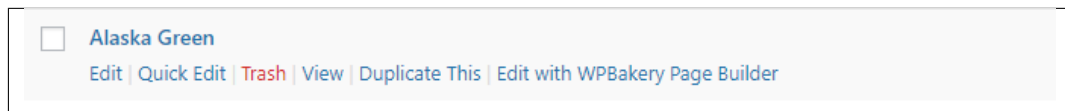

6.1.1 Delete Obituaries

To delete a Obituary, navigate your Dashboard to *Obituaries > Obituaries*

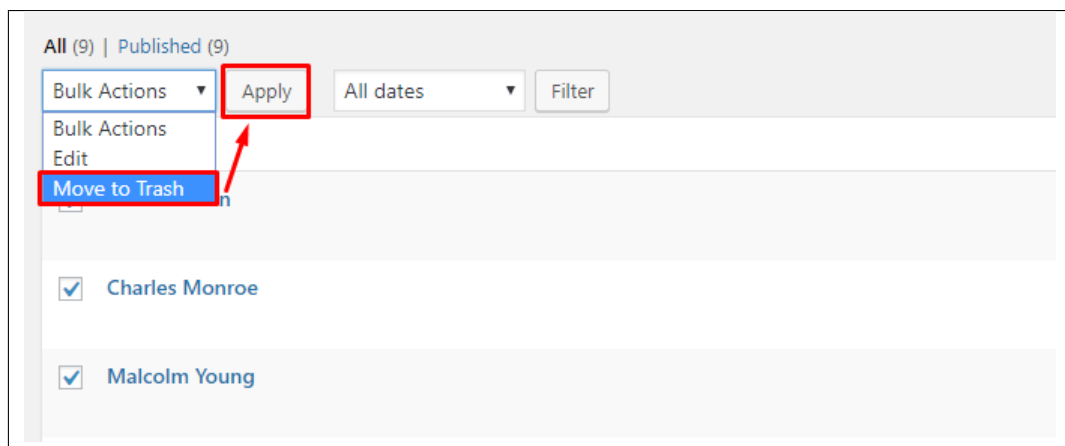

In the Obituaries page, you will see all the created Obituaries.

To delete a Obituary, you have two options:

- **Single Obituary Delete** - Hover your mouse pointer on the Obituary that you would like to delete. You will see a *Trash* option pop-up. Click on *Trash* to delete.

- **Multiple Obituaries Delete** - To delete multiple Obituaries, click on the box beside the Obituaries you would want to delete. Then click on the drop-down box for *Bulk Actions* and choose the *Move to Trash* option. Click on *Apply* button to delete.

6.2 Obituaries Category

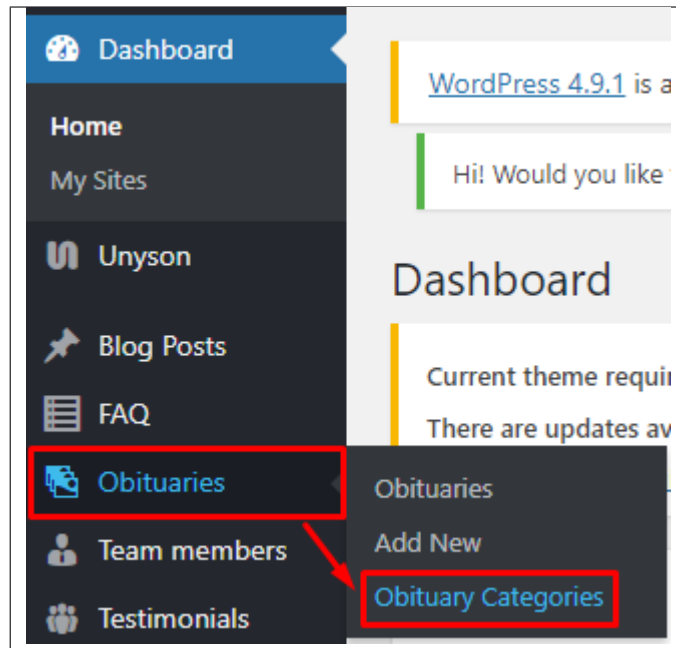

Categories are meant for *broad grouping* of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. **Sub-categories** are made when a Category is added to a Parent Category.

Adding categories to an Obituary would make it easier to locate and post on similar topics by category.

6.2.1 Create Obituaries Category

To create a *Category* for an Obituary, follow these steps:

- **Step 1** - Navigate your Dashboard to *Obituaries > Obituary Categories*. You will see the *Obituary Categories* page.

- **Step 2** - In the page, find the *Add New Category* area. Add All the necessary information.

Products

10.1 Create Products

To create a new *Products* item, navigate in WordPress Dashboard to *Products > Add New*.

The *Add new product* page will show. Add the details for the Products.

The screenshot displays the Magento 2 product creation interface. The interface is divided into several sections:

- 1. Product name:** A text input field at the top left for entering the product title.
- 2. Editor container:** A large text editor area with a rich text toolbar (bold, italic, underline, link, etc.) and a visual/text toggle.
- 3. Product data:** A section containing tabs for General, Inventory, Shipping, Linked Products, Attributes, and Advanced. The General tab is active, showing fields for Regular price (\$), Sale price (\$), and a Schedule link.
- 4. Product short description:** A smaller text editor area below the main editor.
- 5. Product categories:** A section on the right with a list of categories (Flowers, Gift Baskets, Sympathy Cards) and an 'Add new category' link.
- 6. Product tags:** A section on the right with a text input for tags and an 'Add' button.
- 7. Product image:** A section on the right with a 'Set product image' link.
- 8. Product gallery:** A section on the right with an 'Add product gallery images' link.

Additional elements visible include a 'Publish' section at the top right with 'Save Draft' and 'Preview' buttons, and a 'Status: Draft' indicator.

1. **Title** - The name of the Products.
2. **Editor container** - You can add here the role of the Products that will be shown in the website.
3. **Product data**
 - **General Tab** - Information about the Products is added at this part.
 - Regular price (\$) -
 - Sale Price (\$) -
 - **Inventory Tab** -
 - SKU -
 - Manage stock? -
 - Stock status -
 - Sold individually -
 - **Shipping Tab** -
 - Weight (kg) -

- Dimensions (cm) -
- Shipping class
- **Linked Products Tab** -
 - Upsells -
 - Cross-sells -
- **Attributes Tab** -
- **Advanced Tab** -
 - Purchase note -
 - Menu order -
- 4. **Product short description**
- 5. **Product categories**
- 6. **Product tags**
- 7. **Product image** - Products picture that will be shown in the site.
- 8. **Product gallery**

After adding all the details, click on *Publish* button to save.

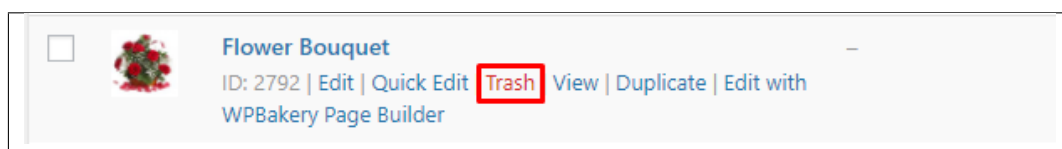

10.1.1 Delete Products

To delete a Product, navigate your Dashboard to *Products > All Products*

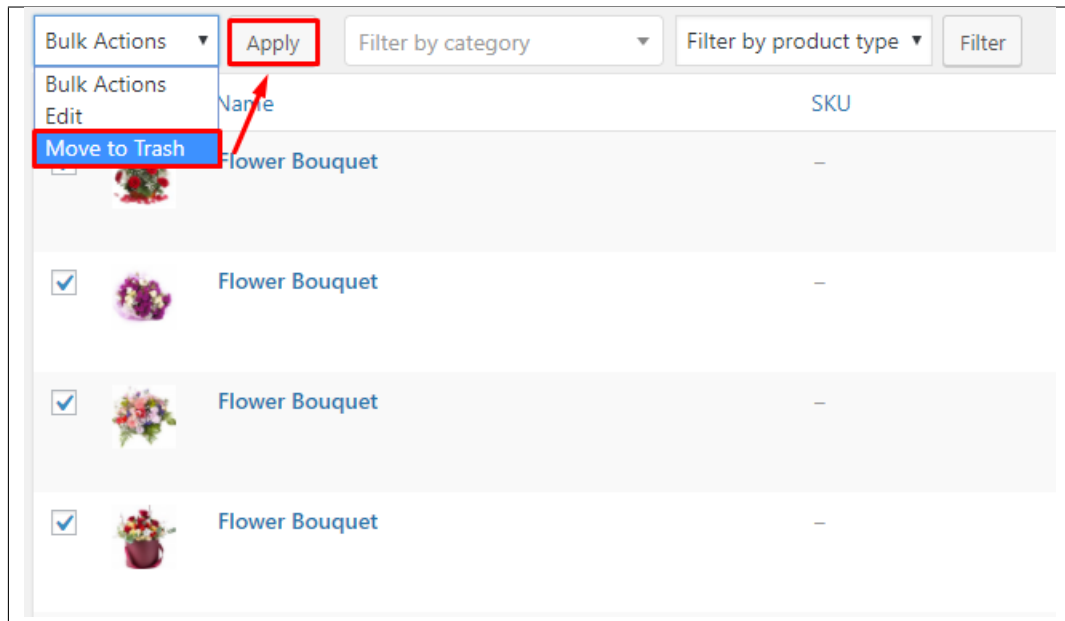

In the Products page, you will see all the created Products.

To delete a Product, you have two options:

- **Single Product Delete** - Hover your mouse pointer on the Product that you would like to delete. You will see a *Trash* option pop-up. Click on *Trash* to delete.

- **Multiple Products Delete** - To delete multiple Products, click on the box beside the Product you would want to delete. Then click on the drop-down box for *Bulk Actions* and choose the *Move to Trash* option. Click on *Apply* button to delete.

10.2 Products Category

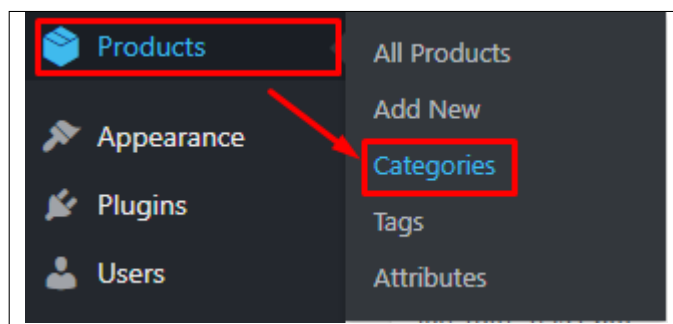

Categories are meant for *broad grouping* of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. **Sub-categories** are made when a Category is added to a Parent Category.

Adding categories to a Product would make it easier to locate and post on similar topics by category.

10.2.1 Create Products Category

To create a *Category* for a Product, follow these steps:

- **Step 1** - Navigate your Dashboard to *Products > Categories*. You will see the *Product Categories* page.

- **Step 2** - In the page, find the *Add New Category* area. Add All the necessary information.

Product categories

Product categories for your store can be managed here. To change the order of categories on the front-end you can drag and drop to sort them. To see more categories listed click the "screen options" link at the top-right of this page.

Add new category

Name

The name is how it appears on your site.

Slug

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Parent category

Assign a parent term to create a hierarchy. The term Jazz, for example, would be the parent of Bebop and Big Band.

Description

The description is not prominent by default; however, some themes may show it.

Display type

Thumbnail

Upload/Add image

Add new category

- **Name** - The name of the category.
- **Slug** - The URL-friendly version of the name. Usually all lowercase.
- **Parent Category** - If the category is a sub-category, then look for the parent category in the drop-down box.
- **Description** - Description of the category.

- **Display Type** - Type of display the category will have.
- **Thumbnail** - Image used for the category.
- **Step 3** - Once done filling out the information of the category, click on *Add New Category* button to save.

10.2.2 Delete Products Category

To delete a Category, navigate your Dashboard to *Products > Categories*.

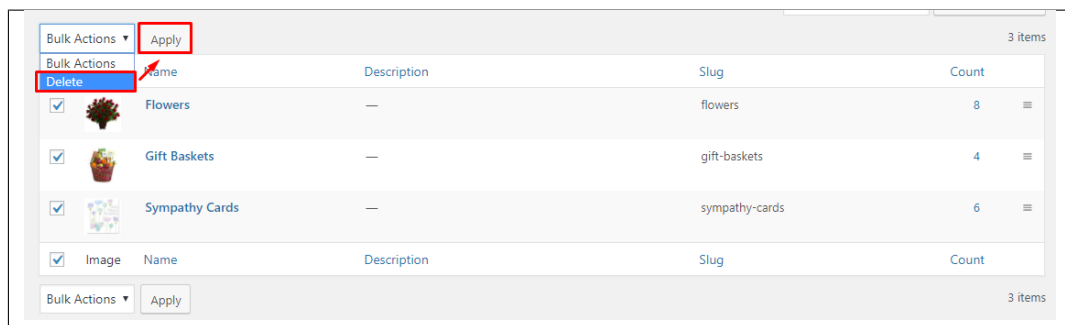

In the *Product Categories* page, you will see all the created category.

To delete a category, you have two options:

- **Single Delete** - Hover your mouse pointer on the category that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple categories, click on the box beside the categories you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

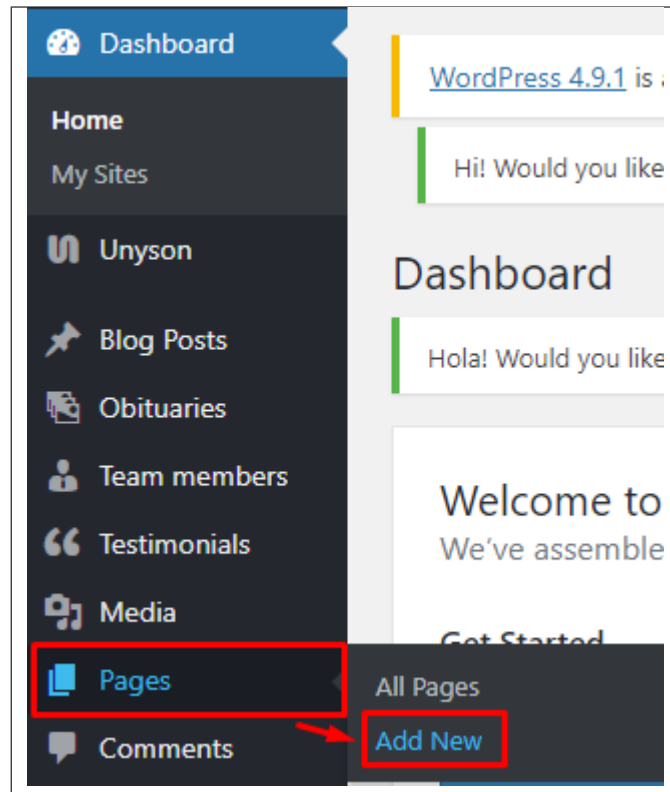

10.3 Create Product Page

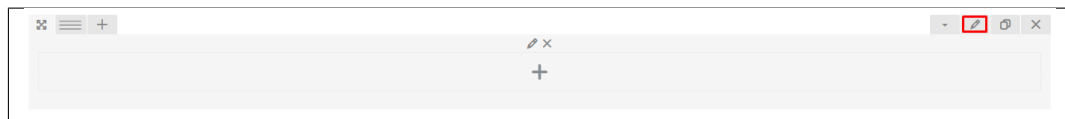

Products of Memoria is generated by the theme from *Products* items.

To create a simple *Product Page*, follow these steps:

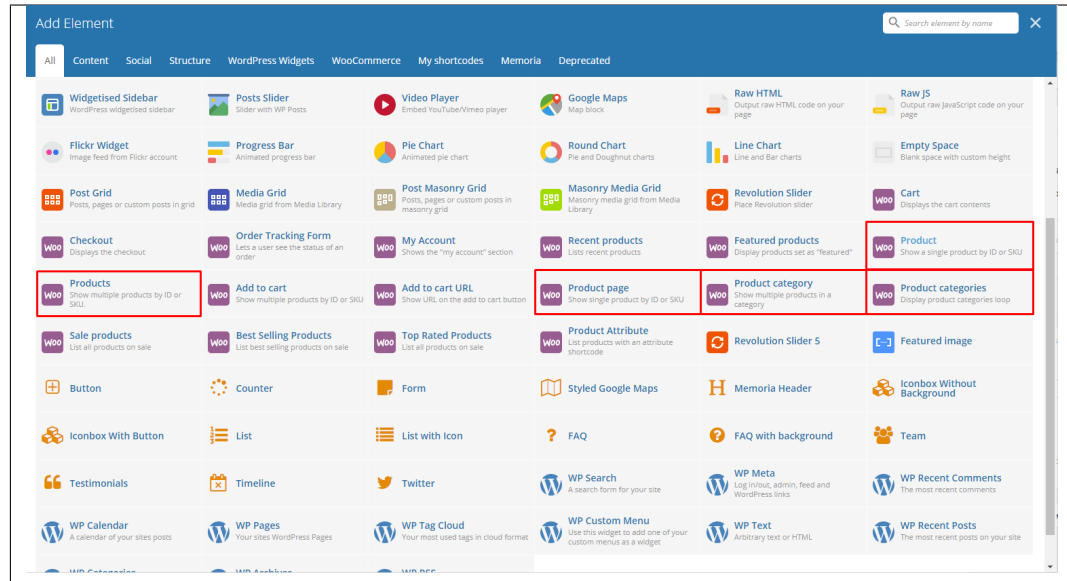

- **Step 1** - Create a new page where to add the Products page.

- **Step 2** - Add a row element to the page, click the *Edit this row* option of the row. The *Row Settings* will pop-up.

- **Step 3** - Change the settings to your preference.
- **Step 4** - In the row, to add a title for the page. You have the option to add a *Text Block* or *Section/Header Title* element.
- **Step 5** - Add a new row to add the *Products* items. To add the *Products* items, add one of these woocommerce elements to the page.

- **Step 6** - Add the needed information for the *Product* element. Click *Save changes* to save.
- **Step 7** - You can add more elements on the page as you like. Once satisfied, click on the *Publish* button.

Widgets & Menu

11.1 Widgets

Widgets are small blocks of content, which you can find in theme footer or sidebar. They were originally designed to provide a simple and easy-to-use way of giving design and structure control of the WordPress Theme to the user, which is now available on WordPress Themes to include the header, footer, and elsewhere in the WordPress design and structure.

Widgets

[Manage with Live Preview](#)

Available Widgets

To activate a widget drag it to a sidebar or click on it. To deactivate a widget and delete its settings, drag it back.

Active Product Filters

Display a list of active product filters.

Archives

A monthly archive of your site's Posts.

Audio

Displays an audio player.

Calendar

A calendar of your site's Posts.

Cart

Display the customer shopping cart.

Categories

A list or dropdown of categories.

Custom HTML

Arbitrary HTML code.

Filter Products by Attribute

Display a list of attributes to filter products in your store.

Filter Products by Price

Footer 1 column

Footer 2 column

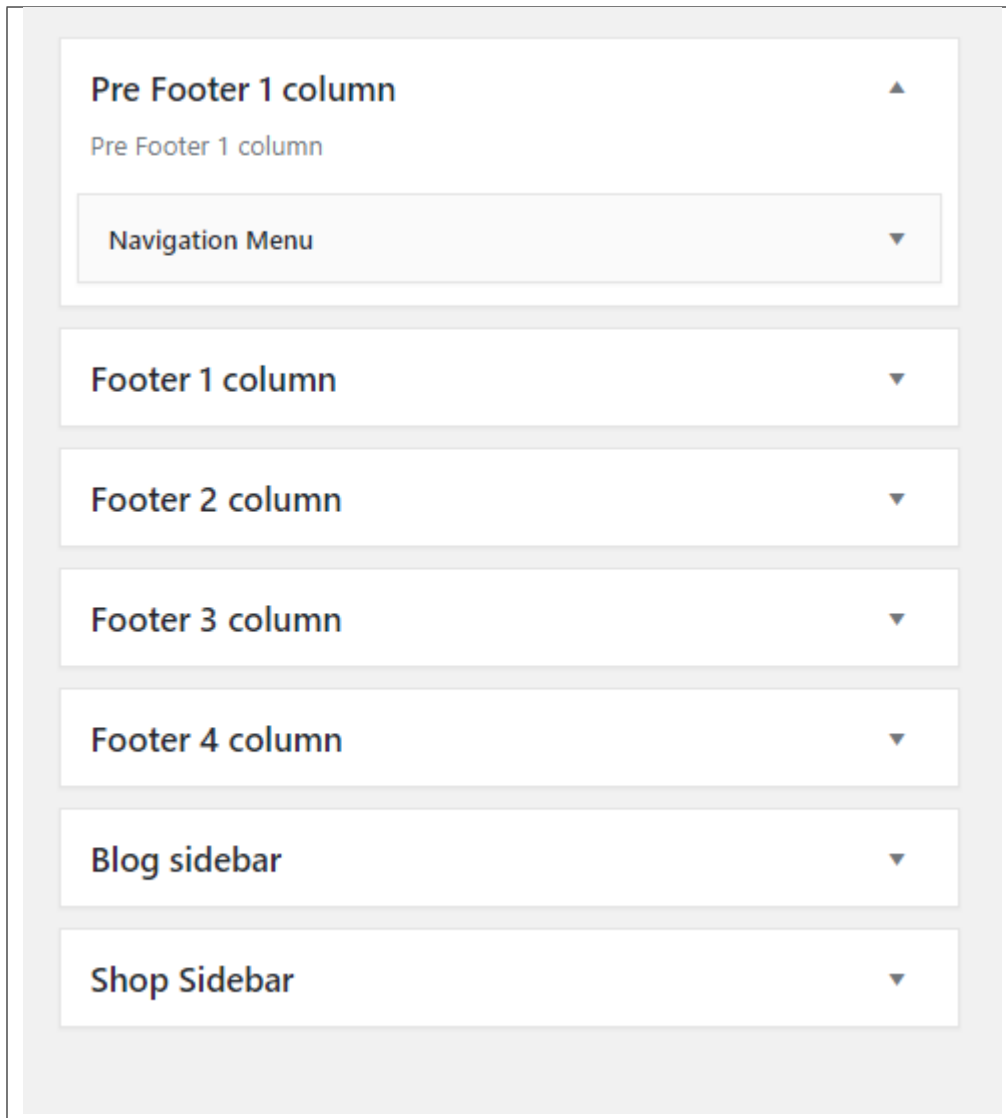

Footer 3 column

Footer 4 column

Blog sidebar

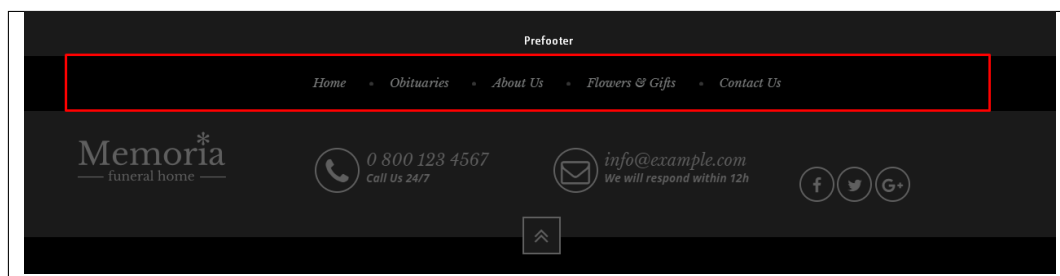

Shop Sidebar

11.1.1 Sidebars

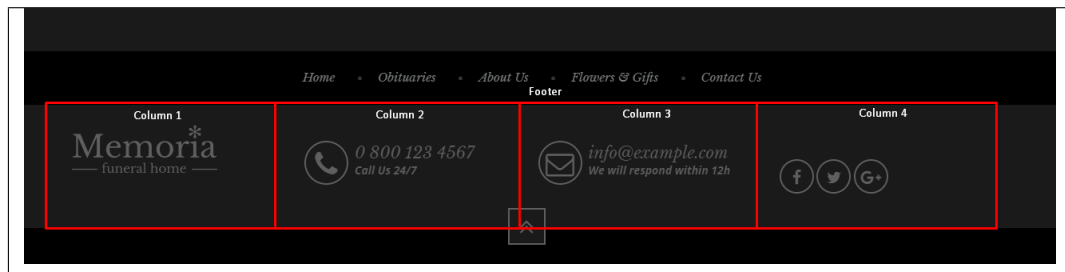

In Memoria you have access to 7 sidebars that can be customized using available theme widgets.

- **Prefooter 1 column**

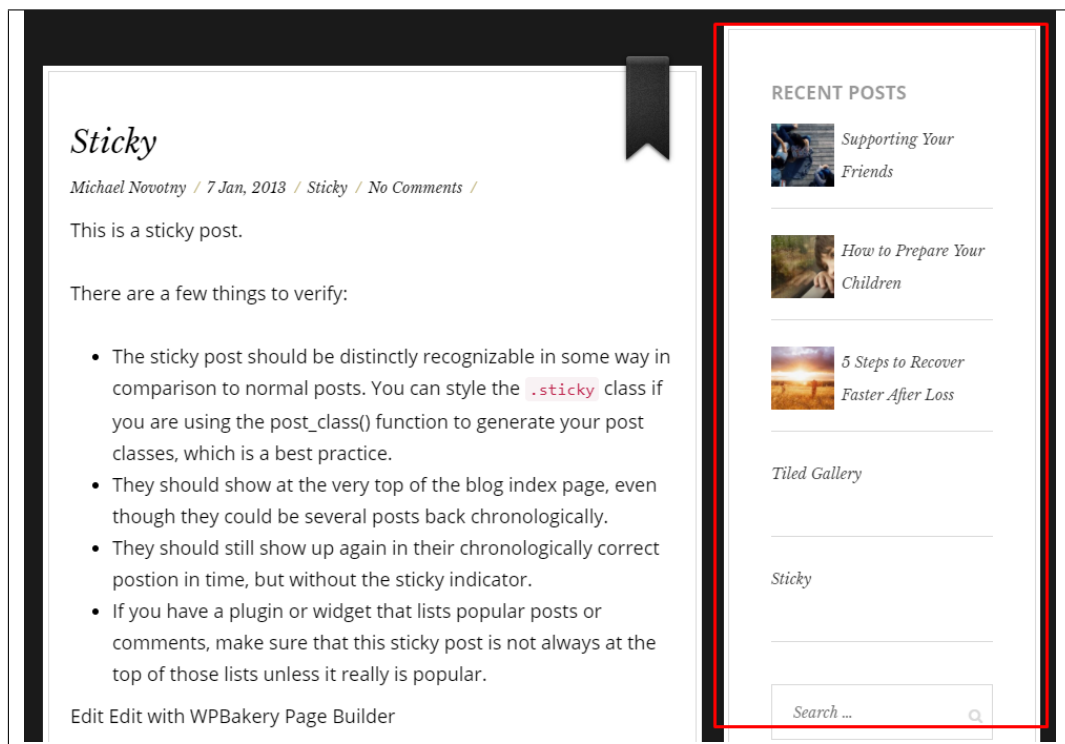

You can enable/disable the pre-footer in the *Appearance > Customize > Footer*, then uncheck the *Pre-footer display*.

- Footer 1 to 4 column

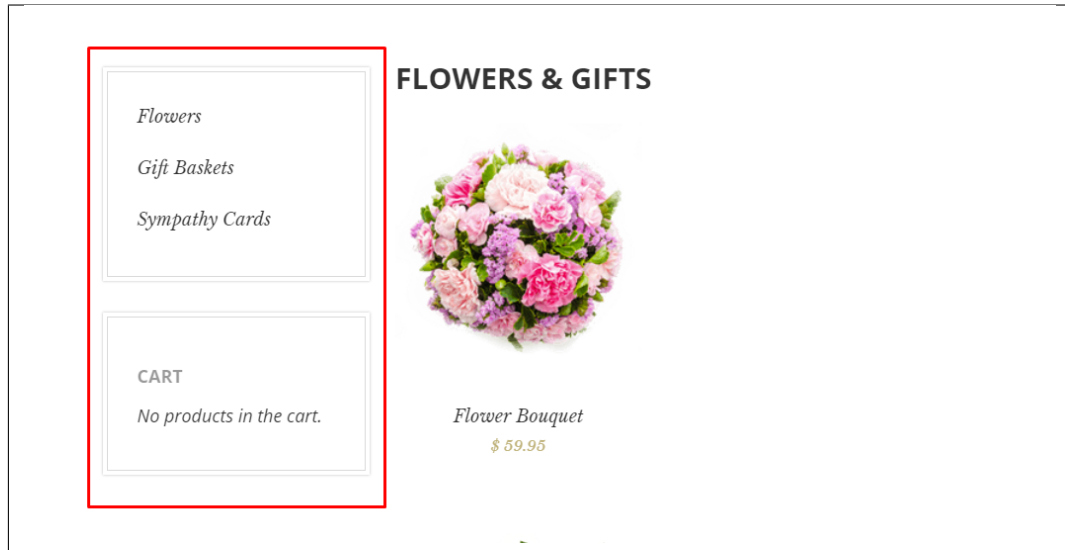

You can enable/disable the footer in the *Appearance > Customize > Footer*, then uncheck the *Footer display*.

- Blog sidebar

You can enable/disable blog sidebar in the *Appearance > Customize > Blog Settings > Blog/Single blog post*, then uncheck the *Display blog sidebar*.

- Shop Sidebar

11.1.2 How to Edit Widgets

You can access widget edit screen under *Appearance > Widgets* panel or via *Customize* on path *Appearance > Customise > Widgets*. It has three main areas:

- Available Widgets
- Inactive Widgets
- Inactive Sidebars and widget areas

To add a widget to your site, drag and drop the name of the widget you want to use from the *Available Widgets* section into one of the widget areas on the right-hand side of the window. After you have added it, the widget will open up (or if it doesn't, you can click on the triangle to open it) and you can change the settings and save the widget. The specific settings needed will depend on what type of widget you are using. For instance, if it is a text widget, you just need to type in the text (and optionally, HTML code), and save the widget.

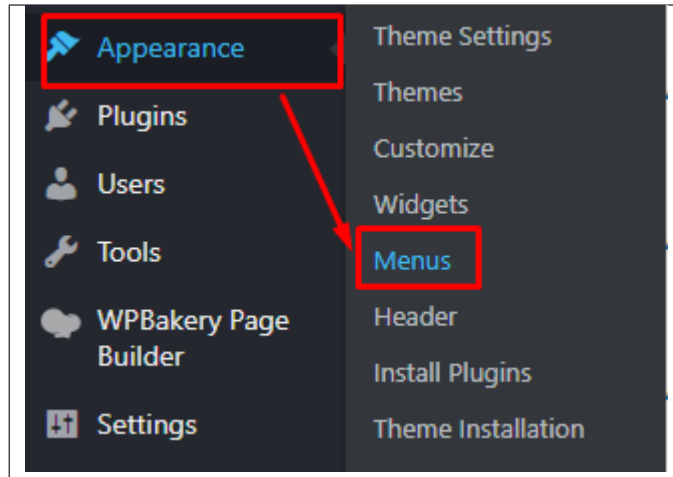

11.2 Menus

This guide covers the basic tasks a user may carry out when using the built-in menu editor.

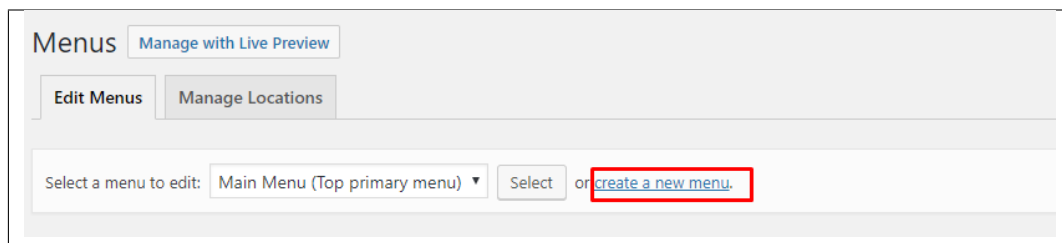

11.2.1 Menu Setup

To make a simple menu, follow the steps:

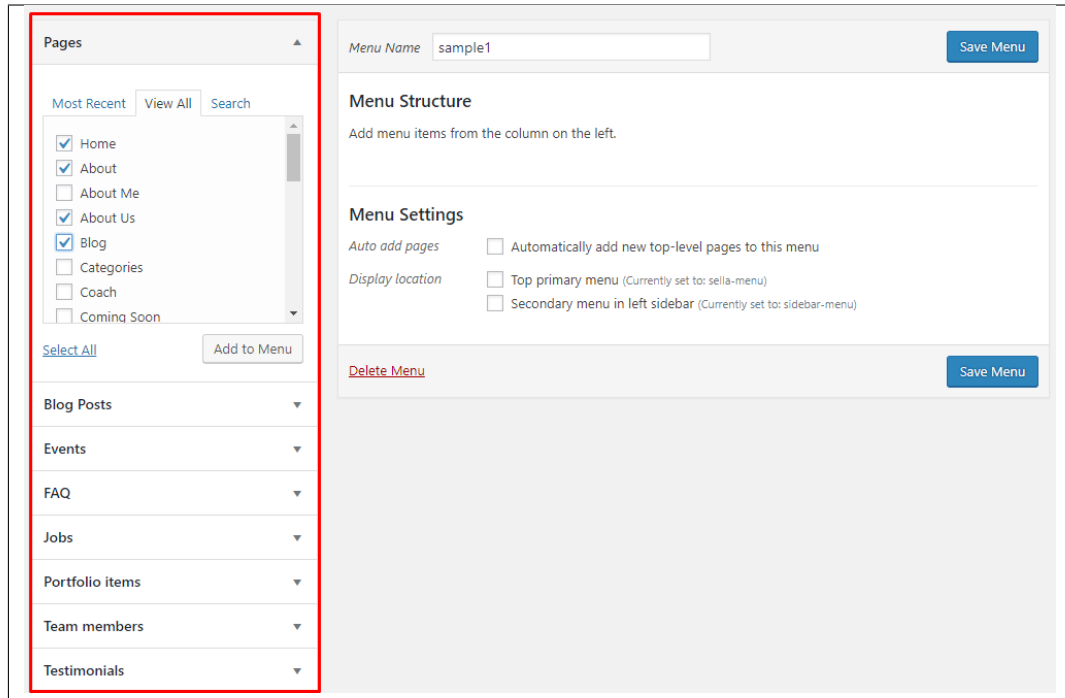

- **Step 1** - Navigate your Dashboard to *Appearance > Menus*. The *Menus* page will show.

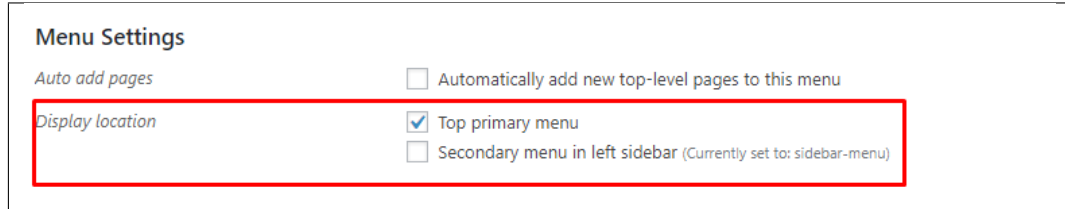

- **Step 2** - In the menus page, you can edit a menu or make a new menu. To make a new menu, locate *create a new menu*.

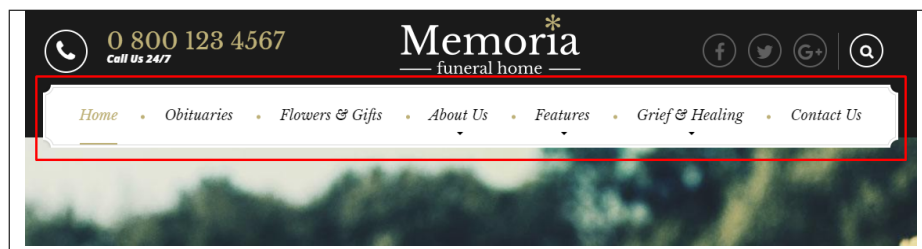

- **Step 3** - You will be asked to name your menu. After naming the menu, click *Create Menu*.
- **Step 4** - From the right side choose pages, links, or categories that you want to add to your menu and click on *Add to Menu*. Once menu items are added, you can reorder or nest them via drag and drop tool. Remember to click Save Menu when you finish to keep your changes saved.

- **Step 5** - You can set a menu as a *Top primary menu* or *Secondary menu in the left sidebar*.

1. **Top primary menu** - visible on the top of the page.

2. **Secondary menu in the left sidebar**

- **Step 6** - After any changes, click on *Save Menu* button.

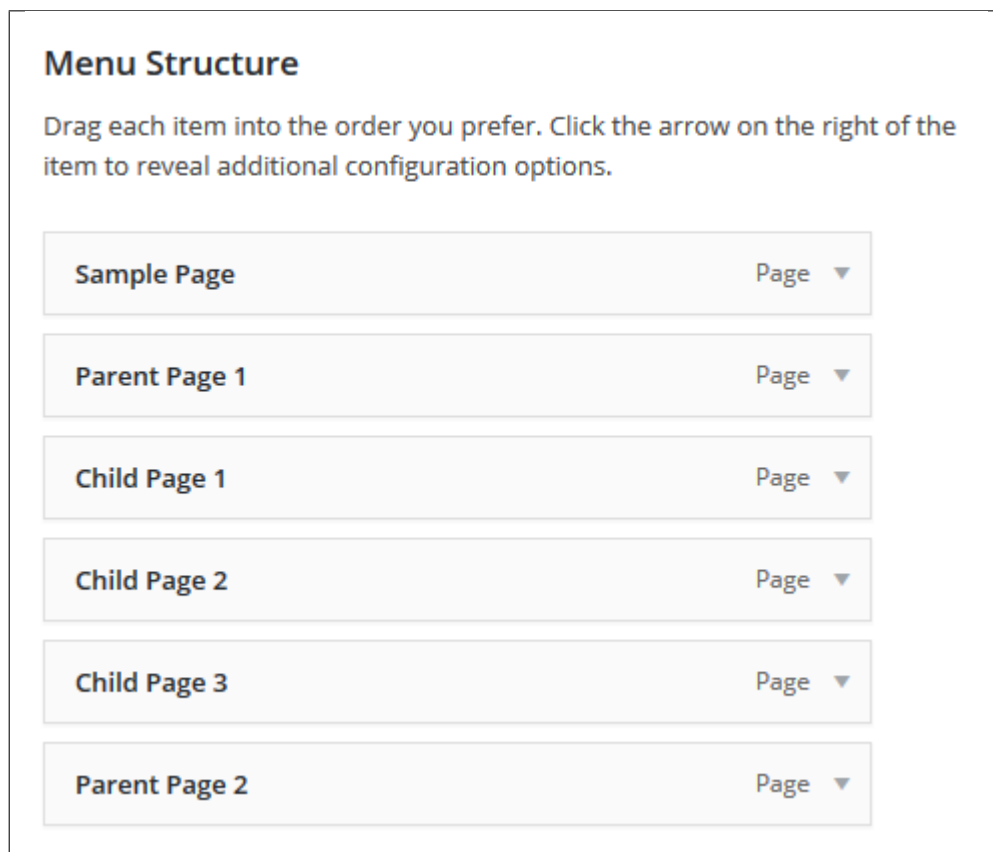

11.2.2 Multi-level Menu Setup

When planning the structure of your menu, it helps to think of each menu item as a heading in a formal report document. In a formal report, main section headings (Level 1 headings) are the nearest to the left of the page; sub-section headings (Level 2 headings) are indented slightly further to the right; any other subordinate headings (Level 3, 4, etc) within the same section are indented even further to the right.

The WordPress menu editor allows you to create multi-level menus using a simple ‘drag and drop’ interface. Drag menu items up or down to change their order of appearance in the menu. Drag menu items left or right in order to create sub-levels within your menu.

To make one menu item a subordinate of another, you need to position the ‘child’ underneath its ‘parent’ and then drag it slightly to the right.

- Position the mouse over the ‘child’ menu item.
- While press and holding the left mouse button, drag it to the right.
- Release the mouse button.
- Repeat these steps for each sub-menu item.
- Click the **Save Menu** button in the *Menu Editor* to save your changes.

Menu Structure

Drag each item into the order you prefer. Click the arrow on the right of the item to reveal additional configuration options.

CHAPTER 12

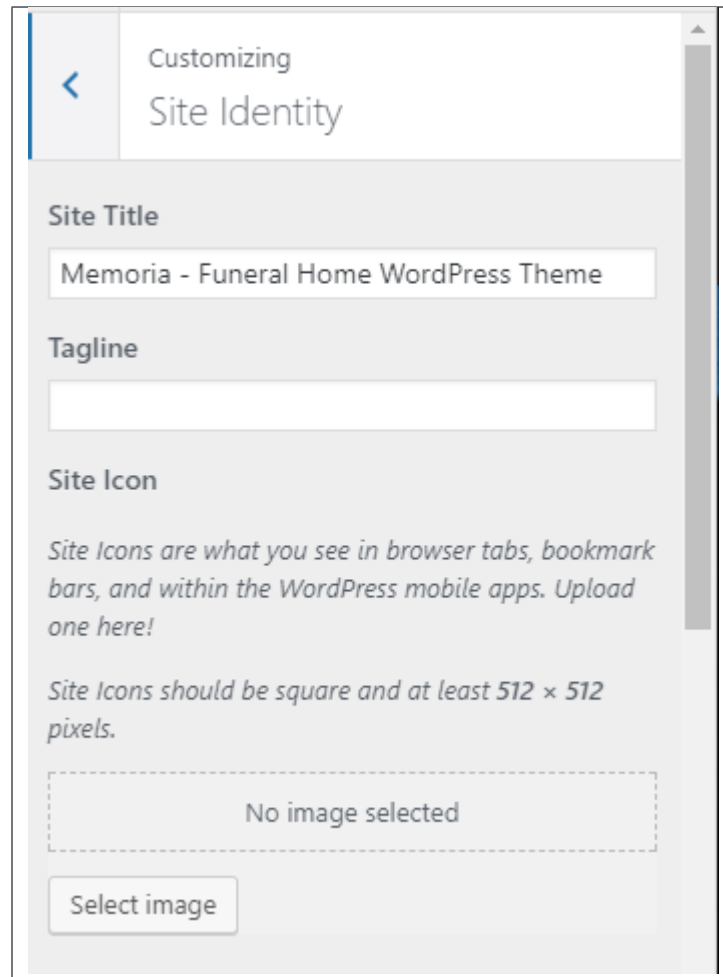

Customising Memoria

Memoria comes with an advanced customizer, which allows to edit most of the theme's elements in one place. If you want to use it, navigate to *Appearance > Customize*.

12.1 Site Identity

Here you will have the option to customize your site's identity or how it can be viewed by people.

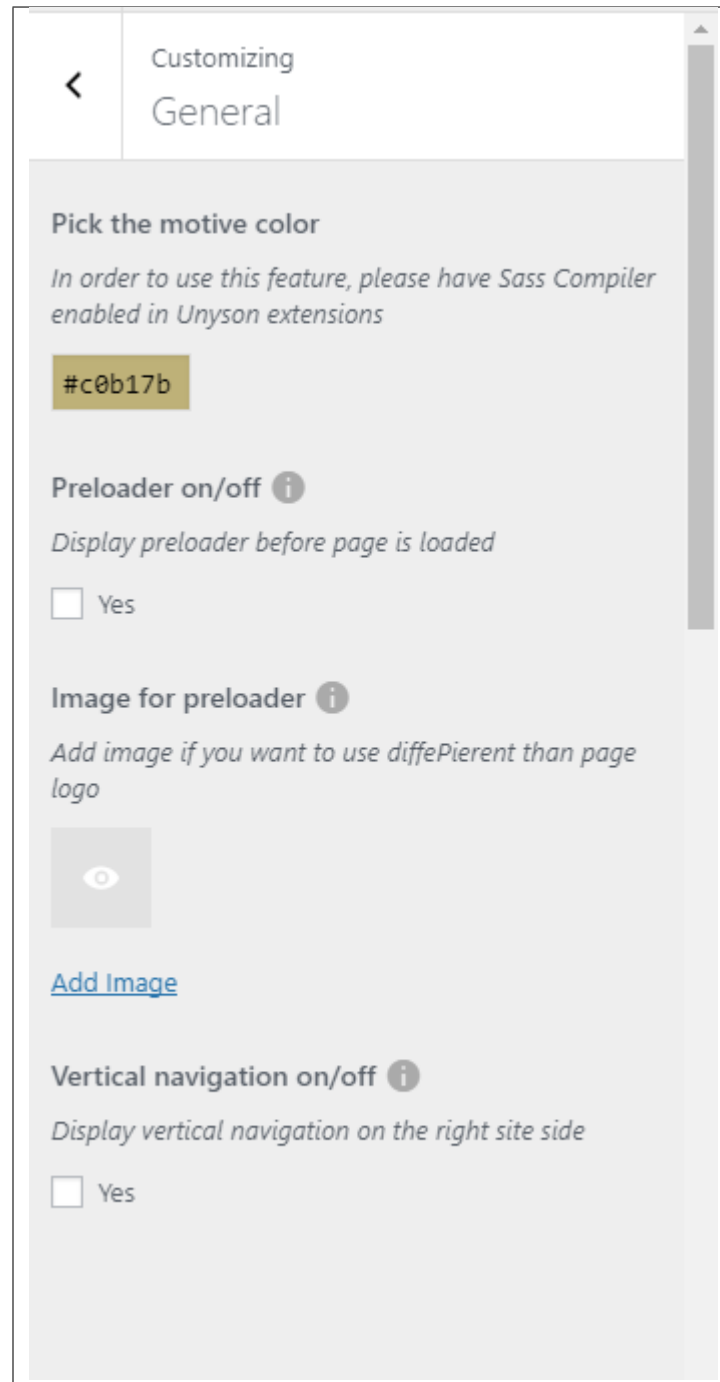

A screenshot of the WordPress 'Customizing Site Identity' interface. At the top, there is a header bar with a back arrow and the text 'Customizing Site Identity'. Below this, the 'Site Title' section contains a text box with the value 'Memoria - Funeral Home WordPress Theme'. The 'Tagline' section has an empty text box. The 'Site Icon' section includes a descriptive paragraph: 'Site Icons are what you see in browser tabs, bookmark bars, and within the WordPress mobile apps. Upload one here!' followed by another paragraph: 'Site Icons should be square and at least 512 x 512 pixels.' Below the text is a dashed rectangular box containing the text 'No image selected'. At the bottom of the section is a button labeled 'Select image'.

- **Site Title** - The title of the site you created.
- **Tagline** - The slogan/catchphrase for your site. What people will remember if they see your site.
- **Site Icon** - The icon used as a browser icon. Icons must be square, and at least 512 pixels wide and tall.

Add all the information you like to add, then click on the *Save* button.

12.2 General

You can pick the color scheme of the site here.

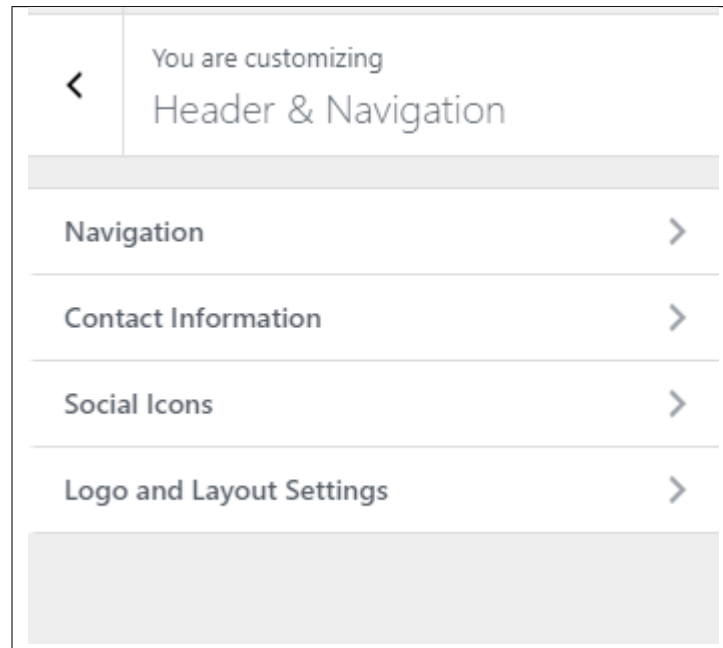

Note: In order to use this feature, please have SASS Compiler enabled in Unyson extensions.

- **Pick the motive color** - Pick the main color scheme of the site.
- **Preloader on/off** - Display preloader before page is loaded.
- **Image for preloader** - The image that will show in the preloader.
- **Vertical navigation on/off** - Option to show or not the vertical navigation on the right side of the site.

Add all the information you like to add, then click on the *Save* button.

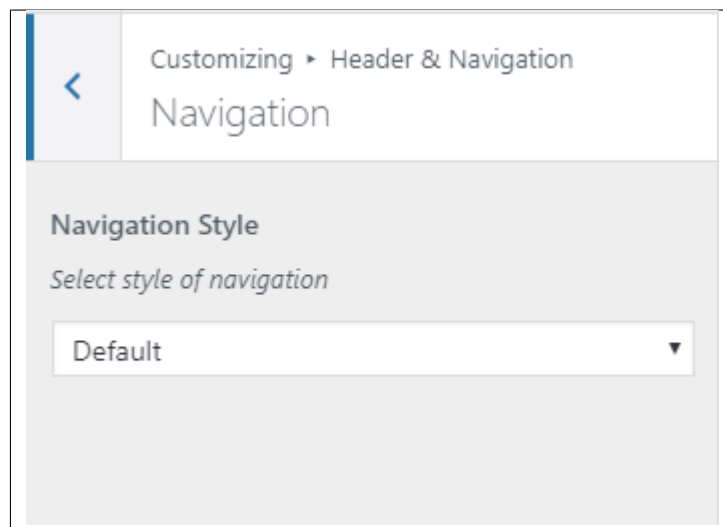

12.3 Header & Navigation

Header & Navigation is divided into 4 parts:

- **Navigation**

- **Navigation style** - How the navigation of the header behaves.

- **Contact Information**

- **Text After Contact Number** - Text displayed after the contact number.
- **Contact Number** - Contact number that will be displayed at the header.

- **Text after Email Address** - Text displayed after the Email address.
- **Email Address** - Email address that will be displayed at the header.

The screenshot shows a customization interface for the 'Contact Information' section. At the top, there is a breadcrumb trail: 'Customizing > Header & Navigation'. Below this, the title 'Contact Information' is displayed. The form contains four sections, each with a title, a descriptive instruction, and an input field:

- Text After Contact Number**: Enter text which be displayed in Top Bar. Input: Call Us 24/7
- Contact Number**: Enter the Contact number which be displayed before the contact text. Input: 0 800 123 4567
- Text After Email Address**: Enter text which be displayed in Top Bar. Input: We will respond within 12h
- Email Address**: Enter the Email Address which be displayed before the email address text. Input: info@example.com

- **Social Icons**

- **Search Icon Display** - Option to display header on top of the pages.
- **Facebook**
- **Twitter**
- **Pinterest**
- **Instagram**
- **RSS**
- **LinkedIn**

- Google Plus
- Tumblr
- Skype
- Dribble
- DropBox
- Flickr
- GitHub
- Stack Exchange
- Stack Overflow
- Vimeo
- Weibo
- Xing
